Oratorical Contest

On Wednesday evening, May 4, at the Baptist Church, an oratorical contest took place under the auspices of the Baptist Young People's Union.

Six contestants spoke on various subjects and kept the large audience interested for an hour or more.

This contest was preparatory for the Silver Cup Contest at Gull Lake in July during the Baptist Summer Assembly. The following were the contestants with their subjects.

Brenda Rowe.—"The value of the B.Y.P.U. to Western Canada."

Ina Miller.—"Ann of Ave."

Ethel Lane.—"The Apostle Paul."

Selina Wood —"The Pilgrim Fathers."

Dorothea Hunley.—The value of the B.Y.P.U. to the Church"

Ila Wood.—" The Apostle Paul "

Each of the contestants was allowed ten minutes to present their subject, and musical items were provided between the speeches to break the monotony of the proceedings.

The meeting opened by the singing of a hymn after which the pastor led in prayer. Brenda Rowe, the president of the B.Y.P.U. was to the chair, but as she was the first speaker, the pastor occupied the chair during her speech, vacating in her favour as soon as she had finished.

All the speakers are to be congratulated on their efforts, as they made a very creditable showing. All they need is a little more practice to become accomplished speakers.

The judges Mrs. Bares, Mrs. Bigelow and Dr. White, awarded the palm to Brenda Rowe, in Wood being a very close second, the difference between them being six marks.

Mrs. Bares as chairman of the judges, in a few words congratulated the speakers on their very meritorious work, giving special praise and encouragement to Ethel Lane the youngest of the speakers on her fine effort. Mrs. Bares told the young orators that what they needed was a little more animation illustrating the point by her own animation and vigour. The attention of the speakers was drawn to this fact by Mrs. Bigelow in a few well chosen words. After the singing of a hymn the usual prayer meeting was held, to which quite a large number stayed.

Forthcoming Sale by Ladies' Aid

Ladies' Aid Tea and sale of transplanting plants, May the 28th, in Rex Cafe. Sale of plants from 10 a.m., tea starting at 5 p.m.—Advt.

Canadian National Sixth Annual Tour To the Pacific Coast

In pursuance of a time-honored practice of affording its patrons every facility and convenience tending toward more vacation enjoyment, the Canadian National is operating its sixth annual tour confidently believe this will again prove of the greatest aid and convenience to a host of teachers, as well as to professional men and business men and women, vacation bent.

The tour will commence at Winnipeg, from which point a special train of modern sleeping car equipment, dining car and radio observation car, will leave July 4th. The party will be personally conducted by an efficient and experienced representative of the Canadian National.

After stopping at various points of interest, the train will arrive at Prince Rupert on July 8th. At this latter point the party will embark on a palatial steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour train makes at Vancouver, those who desire to make a trip to Victoria may have their tickets read "Victoria" as their destination without any additional cost.

This mode of travel has many advantages. In the first place, it is planned with a view to including in the itinerary the most interesting points of beauty, with the other arrangements that are made, obviates the necessity of the passenger worrying about connections, sleeping car accommodation, meals, and entertainment en route. This is all done in advance by experts, leaving the passenger free to enjoy to the full the scenery and attractions attendant to such tours.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour. 16 33a

Ratepayers' Meeting

A large representative meeting of ratepayers of the village of Delia was held in the Town Hall on Monday evening, to consider the franchise for electric light, and also the suggestion of the National Committee of Ottawa, that every community get together and organize for a celebration of the Diamond Jubilee of the Dominion.

The franchise for electric light was read and explained, and after considerable discussion it was moved that the council proceed with the passing of the by-law, signing of the petition, and execution of the franchise. Electric light, power and street lighting for Delia will meet a long felt want, and will make a great improvement to the village.

Diamond Jubilee Celebration

After considerable discussion it was moved and seconded that a Celebration should be held; that a provisional temporary committee be formed, to get in touch with the various organizations of the district, for the purpose of forming a general committee; that the temporary committee be instructed to communicate with the adjoining municipal districts, the country school districts, the ministers of the various churches, the Women's Institute, the Ladies' Aids, the various lodges, the Great War Veterans Assn., and groups of peoples of foreign extraction, for the above purpose.

The National Committee of Ottawa suggests that, as this is Canada's sixtieth anniversary as a Dominion, the hearts and minds of all her people should be directed to Canada—what she has done in the past, what we hope to make her in the future. They suggest that procession and parades be formed headed by the local bands. In the parades, floats portraying the history of our country. If floats cannot be made, the school children and young people might arrange historical tableaux with dances and music. Veterans should also be requested to join the parades.

Newcomers should be especially requested to take their part in community celebration.

Old settlers, particularly those who took up land in the picturesque manner of the ox train and prairie schooner, should especially be asked to join the celebration.

Wherever public ceremonies are held the flag should be flown in a conspicuous place. On arrival, processions should march past the flag and salute.

An attempt should be made to get all the people of the community together in a great out of doors gathering. Associated with the public ceremonies there should be a picnic or other demonstration, with sports for the children.

The evening should have a concert, with a bonfire or fireworks.

The National Committee expects to furnish particulars later for a uniform type of electrical illumination for the whole country. That being the case, here is hoping that the Drumheller Power Company have the installation of electrical power in Delia completed in time.

During the evening of July 1st, it is hoped to broadcast a patriotic concert to be played on the carillon of bells in the tower of the Federal Parliament Building, Ottawa.

Saturday, July 2nd, has been set apart for a Sports' Day.

Sunday, July 3rd, is indicated as a day of Thanksgiving and Prayer for a community service. The National Committee hopes to provide orders of service with suitable hymns.

Finances are suggested to be raised by:—1st, Municipal Grants; 2nd, Voluntary subscription; 3rd, Sale of souvenirs; 4th, Small admission fee for certain sports etc.

The National Committees are intending to furnish further information for the guidance of local committees, and towards carrying out work of an educational character.

The local committee formed in Delia earnestly request the co-operation of all organizations throughout the district. Although in operating this work we start at once to appoint committees where it has not already been done, so that all these committees may get together and on early date and formulate a plan whereby this proposed DIAMOND JUBILEE celebration may be carried out with a huge success. The Delia Committee will send out communications to the various societies and organizations at an early date, with a view to arranging a meeting of the general committee. This meeting should be held soon, as there is only a few weeks time left all plans to be brought to a conclusion. It should be borne in mind by everyone that we cannot hope to get very much assistance, as practically every community in Canada will be celebrating the same time, therefore everybody here should put their shoulder to the wheel and push for the one big idea, A CELEBRATION THAT WILL REMAIN IN THE MINDS OF THE YOUNGER GENERATION ALL THEIR LIFE.

The only check on extravagant women would put on her activities is a bank check.

Forty Men Placed On Farms One Day

With a total of 232 placements on farms last week, the Calgary office of the Alberta government employment service sent out an average of nearly 40 men a day to farms during the period, according to the report issued on Monday by William Carnill, superintendent. The demand kept up better during the week than was expected.

On Monday morning there was a fair demand for farm help, and the superintendent said that probably 20 to 25 men a day would go to farms this week. He also said that there was plenty of men to take care of the situation.

Unless farmers retain their help after spring seeding operations are completed, Mr. Carnill intimated the possibility of a surplus of labor shortly. No men were brought into the province this spring by the employment service, the demand being easily taken care of by the local supply augmented by the usual movement of men from lumber and mining camps to the farming districts.

STONELAW NEWS

Seeding is in full swing in this district.

Mr. C. Erbe did some stack threshing for Mr. Johnie Slater last Monday.

Mr. Brown had his collar bone broken by falling off a hayrack and has gone to Calgary to see a doctor.

Mr. Frank Slater is much improved after an illness of five months.

Mrs. McCarty took a car load of people to the show in Big Valley on Saturday night.

Mr. Arthur Steusland is quite ill with the flu.

Mr. and Mrs. Severin Sverdahl and family and Mr. Lewis motored up to Ed. Trickels on Thursday last.

CRAIGMYLE NEWS.

"Mothers' Day" was duly observed in the United Church Sunday School last Sunday, when the service outlined by the Religious Education Council of Alberta was followed, and the pageant "The Coronation of Mother," was put on by the scholars. At the church service in the evening Rev. H. Pyper preached a sermon appropriate to the day, to a large congregation. The boys' and girls' choir were in full attendance, and rendered some numbers.

The weather of last Saturday drove the farmers off the land, and on Sunday there were intermittent showers. Over an inch of moisture fell on Saturday alone. With the moisture we have already had this season, and the rain of last week end, it looks as though the slough to the south of town has little prospect of reseeding much in the near future, therefore it has been decided to drain it at the south-east end, as the road on the west side, which is the main approach to town from the government road on the west, is covered by water at least a foot deep. After the water has been drained the road is to be graded to a higher level.

Mrs. Ellwood is visiting her daughter Mrs. A. P. Geissinger.

Despite the snow and rain of Saturday and Sunday some farmers of the district were able to carry on seeding on Monday afternoon, and most of them were at it again in full swing on Tuesday. Early sown wheat is already above ground.

MAJESTIC AND FARRELL LAKE NEWS.

Let's go to the hard time dance at the Farrel Lake on the 20th of May, given by the Busy Bees Girls' Club. 25c fee for luxuries. Admission—Gents, 75c. Ladies please bring lunch. Don't forget the date.

Spring operations have been held up on account of bad weather.

We are glad to report Zelma Wylie is able to attend school after her illness.

Buckley Limpert is convalescing at his home, after his operation in the Drumheller Hospital.

Card of Thanks

In behalf of the Ladies' Aid we wish to extend our thanks to those who took part in the play and worked so hard to make it such a great success.

Signed in behalf of the executive.

RUTH LANE, Sec.

W. J. Jackman, Wheat Pool director for the Edmonton district, will address a series of meetings along the Canadian National Railway in British Columbia. Many wheat farmers there are anxious to join the Pool. The new contract provides for their admission.

SERVICE WITH A SMILE

STAN. WALKER, Proprietor

To Members of the Wheat Pool:

Once each year Wheat Pool members are called to choose the men they want to administer the affairs of the Pool for the coming year. To successfully direct a business of this magnitude requires that men of outstanding merit be selected. They must be chosen by the Pool members themselves. It is your job. It is both a privilege and a duty. Don't neglect it!

The system of electing Delegates was changed at our last Annual Meeting. Instead of sending each member a ballot card we are now required to send him a NOMINATING PAPER. You will find this on the back page of the membership list. Full instructions for using it will be found on the inside front cover and on the back page. Note that the nomination of any member must be SIGNED BY TEN MEMBERS and the Nomines must sign in the place provided on the Nominating Paper. All nominations must be returned to Head Office not later than Wednesday, June 15th next.

The first thing is to see that the member you want as your Delegate is duly nominated, then get your Nomination Paper into Head Office before June 15th, then watch for your ballot paper about the first of July. When it reaches you, use it promptly, being careful to follow the instructions which will accompany it.

Blue Sky Laws Badly Needed

With better times now prevailing and business expanding in all directions, work plentiful and wages good, high pressure salesmen of stock in all manners of companies are again much in evidence. Some of the propositions laid before people who have a few dollars to invest are sound enough; others are speculative to a degree, with the probabilities that any money invested will be lost, or at best, will not be productive of dividends for years to come. The more glowing the prospects held up to the gaze of the unwary the greater the possibility that the investment is a decidedly risky one; in fact, not an investment at all.

Unfortunately, it is no extremely difficult matter for anybody but an expert, or close to one, to tell the honest from the dishonest, or to distinguish between the good and the bad of the stock selling propositions presented to the general public. The only safe course to follow before parting investment in any stock, is to consult a banker or some reputable financial institution. It is better to be safe than sorry.

It is furthermore unfortunate that the company laws of Canada do not provide adequate protection of the public against these professional promoters of unscrupulous stock and securities schemes. Canada has reason to be proud of its general code of laws, but in this one respect the Dominion of Parliament has been sadly negligent of its duty in that it has not provided safeguards against the people being victimized by persons and corporations offering questionable stock for sale in an unsuspecting public.

Some provincial governments have endeavored to protect their people, only to have their best efforts largely defeated because of the refusal of the Dominion authorities to supplement those efforts. As a result thousands of Canadians every year are robbed of millions of long earned savings.

For example, some years ago the Saskatchewan Legislature passed an act prohibiting the sale of stocks of any kind within the Province unless the Company offering the same first submitted their proposals to the Local Government Board and obtained the approval of that body before any money in the stock being offered for public subscription. Certain companies incorporated under Dominion charters challenged the right of the Province to so restrict their stock selling activities, and, upon an appeal to the courts, the Saskatchewan law was declared ultra vires so far as companies incorporated at Ottawa are concerned. The situation, therefore, is that any company holding a provincial charter and whose stock the Saskatchewan Local Government Board will not permit being sold, can go to Ottawa and obtain Dominion incorporation at Ottawa to defy the Saskatchewan Legislature and sell any kind of stock it likes, good or bad.

It will be recalled that much the same situation existed when the Provinces first adopted prohibitory liquor laws. The Provinces could and did prohibit the retail sale of liquor, but they were powerless to stop its manufacture within their boundaries, and equally powerless to prevent it being brought into the Provinces from other provinces or foreign countries, because this would be to interfere with trade and commerce which come solely within Federal jurisdiction. Public opinion, however, became so aroused that the Dominion authorities were forced to bow before it, with the result that the law was amended to provide that no liquor could be sold where prohibition it became unlawful under Dominion law to ship liquor into that Province.

There is need for a similar enactment in relation to Company incorporation. All that is needed is a very simple amendment by the Parliament of Canada to the effect that, where any Province passes an Act prohibiting the sale of stocks of companies incorporated by the Dominion unless certain requirements are complied with by the Provincial authority, such law shall be applicable to a Company incorporated under Dominion charter in so far as that province is concerned.

To the average citizen there would appear to be no insurmountable difficulty in the way of passing such a simple amendment as the above, but the average citizen would imagine that the Dominion Government would be just as anxious as Provincial Governments to protect their people from being victimized by unscrupulous promoters of worthless stock schemes. The amazing thing is that, notwithstanding pressure from Provincial Governments, representations from reputable business organizations, strong editorial support from the press of Ontario, and repeated efforts by government officials to do anything, but allows a deputy minister at Ottawa to stubbornly block all efforts made to provide ample safeguards to protect Canadian citizens.

Representations have for some months past been made to one Provincial Government regarding the operations of one of these high pressure stock selling companies, and protesting against what amounts to legalized robbery, but the Provincial authorities have to stand helplessly by and see the powerless because the Company in question operates under a Dominion charter.

And within recent weeks this very Company has been shown up in reputable financial journals as having secured over $5,000,000 from Canadian citizens, of which considerably more than $1,000,000 went into the pockets of the subsidiary company as "commission" for selling the stock. In fact, the parent Dominion company has less than $4,000,000 to its credit out of the two dollars invested by the public. Not only so but the Company has never declared a dividend, and for every dollar's worth of goods it has manufactured it has used two dollars' worth. How long a business can be carried on by the Company is still being permitted to sell stock throughout Canada and is doing so to unsuspecting people on the strength of rosy promises of big dividends to come.

It is high time that a certain cabinet minister at Ottawa freed himself from the influence of a reactionary and autocratic deputy head, and drafted legislation to be presented to Parliament at its next session upholding and augmenting the Provincial in their efforts to put an end to the unscrupulous and legalized robbery, which today is a blot on the fair name of Canada.

London Man's Unusual Watch

Tells Time of Day in Ten Different Parts of World

Nicholls J. Nicholls has been dubbed London's "ten time man" because he owns the only watch in the world that tells the time of day in ten different parts of the world. The unusual watch has ten hands, each telling the time of day in a different part of the world.

The hands are painted different colors. They represent the time in New York, San Francisco, Chicago, London, New Orleans, Buenos Aires, Melbourne, Shanghai, Capetown, Calcutta and Midland.

The farmer can give you spades, even if he has no cards to hand out.

Governor of Rotary

T. A. Torgeson, of Estevan, is Elected District Governor

T. A. Torgeson, of Estevan, Sask., was declared elected as district governor for the coming year at the close of the first session of the fourth district convention at Weyburn yesterday. One thousand persons were in attendance.

Sounding the note of high idealism which characterized the objects of Rotary, past international president, H. A. Moses, appealed for the establishment of these ideals in the life of every Rotarian, in a stirring address.

The governor's report showed Redberry, Alberta, to have won the George Rocke trophy for attendance during the year, while Prince Albert club won the Osborne trophy for the largest percentage increase in attendance.

The grandson of the man who blew out the gas now starts the automobile motor with the car in a closed garage.

MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 2680

Canadian Offices in London

Offices of Immigration and Trade and Commerce May be Combined

Hon. Robert Forke, Canadian minister of Immigration, and Hon. James Malcolm, minister of trade and commerce, while in England this summer, will jointly consider the feasibility of combining in one building the branch offices in Britain and on the continent of their respective departments, it is understood. Such a procedure would eliminate duplication of premises and to a certain extent duplication of office staffs.

Mr. Malcolm has already received intimations that the allocation of $100,000 for advertising Canadian goods in Britain will not go very far in making a widespread appeal. It is understood that one suggestion meeting favor is that when big Ragtime steps take a large space for general advertisement, Canada should pay a proportion of the cost so that a number of space calls to attention specially to Canadian goods.

Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nervilina

Those who have tested out numerous liniments will agree that where Nervilina is needed, it dissolves a deep-seated, more or less chronic condition there is nothing to compare with Nervilina. It is because Nervilina penetrates so deeply, because it has such a great fund of the strength of the ordinary oily preparation, it has come to be, hardly less than by over at Pain. For Rheumatic conditions, muscular pain or stiffness, Nervilina works wonders. A trial proves this. Get a 35 cent bottle from your dealer today.

Canada's Gift to Australia

Maple Trees From Vancouver Island to be Planted at Canberra

Maple trees now growing in the woods of Vancouver Island will form Canada's gift to the Australian people when they open their new national capital at Canberra this month.

Under plans outlined by the Canadian Government, Premier Oliver is arranging for the shipment of a dozen island maples to Australia immediately. The trees will be planted in the grounds of the Canberra Parliament Buildings.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine so equal to baby's tablets for little ones—whether it be for the newborn babe or the growing child. Baby's Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother may safely give them to her baby.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says: "I have three fine, healthy children, to whom, when a little trouble has arisen, we have given only baby's Own Tablets. The Tablets have been a great comfort and help in my home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulates the stomach and bowels, banish constipation and indigestion, break up colds, relieve simple fevers, make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Chinese First Paper Makers

Learned Method by Watching Wasp Says Old Legend

According to an old legend, the Chinese learned to make paper by watching the wasp build her nest. A Chinaman, watching the wasp one day, discovered that she took a little wood, chewed it into paste, and smeared it on her nest. When the paste became dry it turned into paper. Thus the Chinese learned to make paper from wood long before any other people in the world.

World Needs Products Of Tropical Countries

Worst Drawback in Their Development is Disease Says Toronto Professor

The great part which the tropical countries will play, and must play in the future of the world, and the reason their development has been checked for centuries, were detailed in a large audience in Convocation Hall by Dr. Oscar Klotz, of the Department of Pathology, University of Toronto, who during the past summer has carried on important researches in Africa upon Yellow fever. Dr. Klotz, who is Associate Professor of the Royal Canadian Institute, on "The Conquering of the Tropics," carried on his work in Africa for the International Health Board of the Rockefeller Foundation. He has also spent a number of years investigating the disease in other tropical countries.

"For many years," Dr. Klotz declared, "special attempts have been made to open up tropical lands for the development of their natural resources, but the large majority of these have failed, chiefly because, mainly through the lack of adequate knowledge of the conditions of diseases which flourish there." Dr. Klotz referred in detail to a number of the diseases peculiar to the tropics. "It is only through the knowledge of these diseases," he said, "that it will be possible to enter the tropics with impunity. The loss of life and money in attempts to establish plantations or to develop industry and commerce, have been enormous, and much settlement has been at first felt by many in undertaking further progress.

"The largest work for the coming century will be to make the tropics assume their proper place in the advance of civilization. The tropical countries are the natural producers of their storehouse of foods, and their mineral resources are becoming essential to the industries of temperate zones. The only supply which at the present time is not playing its part in the world development is the human. The only supply which can be added to the world's population to make these will not be determined by belligerent forces of arms, but by scientific determination of those features which make it possible to the white man to utilize to the best advantages the products of the hot climates."

Breaking New Land

The Provincial Government, through the Land Settlement Board, has arranged for the breaking of 51 quarter sections of land north of Edmonton—the biggest single breaking contract in the history of the province.

Praises this Asthma Remedy.

A grocery peer of St. Jean Baptiste's Asthma Remedy finds it the only remedy that will give relief, though for fifteen years he had sought out to help. Years of needless suffering would be prevented if Mrs. Kidd's wonderful remedy, at the first warning of trouble. Its use is simple, it's cost is slight, and it can be purchased almost anywhere.

Poultry From Royal Farm

Hens to the thrones of Great Britain and Ireland will be sent each other at the World's Poultry Congress at Ottawa, July 27th to Aug 1st, if the wishes of the owners be heeded. It was recently announced his intention of exhibiting some live birds from his Sandringham farm, but yesterday a word received from H.R.H. the Prince of Asturias, heir to the Spanish throne, that he intends exhibiting some fowls from his own poultry farm.

Couple Taught Forty Years

Rounding out a career of 40 years as teachers together, Mr. and Mrs. Robert Jackinson have just retired from the staff of the Ardmore, Alberta, land public schools, and will reside in Belfast. Jackinson was principal and his wife junior assistant. Mistress, and they taught in Ardmore for 35 years.

The wise man adeptly tries to conceal his ignorance, while the fool awkwardly attempts to display his knowledge.

In order to satisfy a man give him what he thinks he wants

For all pains—Minard's Liniment.

A Puzzle for Scientists

Life Cannot Be Defined Says Professor of London University

That a living organism is not to be differentiated from a non-living substance so readily as is commonly supposed was demonstrated by Professor J. C. Drummond, of the biochemistry department of the London University, in a lecture on "The Chemical Aspects of the Nature of Life." The point he made was that differences in living organisms appeared to be traceable ultimately to differences in the proteins in the constitution of their cells, and that this might give a mechanistic aspect to many biological problems passing into the field of chemistry. Professor Drummond said one could not define "life," because we were but beginning to recognize that only the roughest differentiation could be made between the living and the non-living.

If they attempted to judge which phenomena were characteristic of the living and which were typical of the dead systems, they found that such characteristics as assimilation, respiration, growth, reproduction, irritability and movement were, collectively, typical of the living, and offered a rough and ready method of differentiation, though some of these characteristics might be shown by non-living systems.

HAD BAD SPELLS WITH HER HEART

Mrs. R. G. Hall, Bolton Centre, Que., writes:—"Some time ago I had bad spells with my heart and I believe it was caused by nervousness. I tried everything I could think of, but could get no relief until one of my friends persuaded me to get a box of

MILBURN'S HEART AND NERVE PILLS

After I had taken a few boxes I got wonderful relief.

I now weigh one hundred and thirty-five pounds where, before, I never went over ninety."

Price 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Make it new with DUCO

THE PUBLIC have been quick to appreciate the many advantages of Brush DUCO, and today hundreds of cars are being re-finished right at home.

You will be amazed at the ease with which DUCO can be brushed on your car and you will be proud of the work when it is finished.

We have issued an instruction folder which you can obtain from any DUCO dealer and it is advisable to read this carefully. You can't go wrong if you follow the simple instructions.

If the surface of your car is checked or cracked, give it a coat of Flint Auto and Metal Surfacer before applying Brush DUCO.

Good dealers everywhere can supply you with Brush DUCO, DUCO Thinner, DUCO Polish No. 7, and Flint Auto and Metal Surfacer.

Look for this sign Duco applied to

Survey of Hudson Strait

Objection is Taken to the Term "Arctic" in Describing Conditions

President A. A. Stuhmont, of the Saskatchewan section, United Farmers of Canada, protests against the Canadian Press despatch of April 28, regarding the air survey of Hudson Strait on the ground that it describes the conditions of the strait as Arctic for most of the year.

In reply J. F. B. Livesay, general manager of the Canadian Press, expresses sorrow if the despatch can be construed in the sense complained of, explaining that the use of the term "Arctic" in reference to weather conditions is by no means confined to the Arctic circle.

In conclusion, Mr. Livesay says — "The object of the expedition is to report more fully than has been done hitherto on the period of navigability of Hudson straits, and an effort is made, in eastern and western Canada, who have faith in the Hudson Bay route, will look forward confidently to early encouraging results, however, will not be attained in the winter months without exposing to gales of almost constant hurricane force."

Danger Motorists Should Avoid

Many Accidents Caused by Habit of "Cutting In"

"Cutting In" is one of the greatest causes of accidents on the highways at the present time. There are too many drivers who dash around a car and try to squeeze into a space in the line of traffic that is already crowded. The result is that not only the "cutting in" car, but also all other cars in the immediate vicinity are forced to manoeuvre quickly to avoid piling up on each other.

It is appreciated that some drivers do not wish to pass along behind a slower moving car. But before trying to pass, they should make sure that they will be able to round the car in front and get in the right lane of traffic without causing danger to everyone else on the road.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from the destructive pests, which are responsible for much suffering and fatal suffering to legions of little ones.

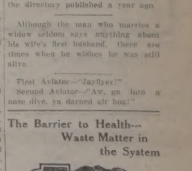
The good old Smith family seems to be disappearing in Washington county, Pennsylvania, but one shows up 2,500. There were 2,000 in the directory published a year ago.

Although the man who marries a widow seldom says anything about his wife's first husband, there are times when he wishes he was still alive.

First Aviator—"Jarfles!"

Second Aviator—"Aw, go into a nose dive, ya darned air hog!"

The Barrier to Health—Waste Matter in the System



Dwase Studio

London, Ont.—"I have never taken a medicine that is so good as Dr. Pierce's Pleasant Pellets. For many years I was bothered with sluggishness. I would become constipated, have dull headaches, feel 'drowsy' after meals, and took different pills but without results until I began taking Dr. Pierce's Pleasant Pellets. Since taking them I have had no such trouble. I take them about twice a week and they keep my whole system in perfect condition. I can never without a bottle of the Pellets and I highly recommend them—there is nothing better." Mrs. Mina Dean, Dundas street, 961 Lorne Ave.

60 Pellets, 20 cts. at any drug store.

Much Activity Shown In Organizing Customs Preventive Service

Ottawa—Parliament last session appropriated $1,000,000 for the customs preventive service, particularly with the idea of strengthening it and action to that end is now being taken.

F. W. Cowan, chief of the service, is organizing the new protective service and has just returned from the Maritime provinces where he went in connection with the new force. It will be spread along the international border and both the coasts. The men are being selected with a view to their fitness for the positions rather than on political lines.

Next week contracts are to be awarded for a fleet of smaller patrol boats and a number of high speed motor cars, while tenders are being called for a good sized fleet of cruisers. These will replace the inadequate equipment now used. It is not yet known how many men will be recruited for the special force but whatever number is necessary will be enlisted in a determined attempt to stamp out smuggling.

Favor Reprisals

United Action on Border Ruling Is Demanded by Delegation

Washington. — "Strong continuous and united action" to secure a confirmation of the present border fisheries treaty arrangement pending an international conference, was demanded by a delegation from the border states of Ontario which presented a brief to Hon. Vincent Massey, Canadian minister.

The delegation recommended reprisals by the Canadian Government against foreign-born citizens of the United States employed in Canada in the event that no agreement is reached.

S. G. Odette, Liberal member of Parliament for East Essex, Thomas Jackson of Windsor, Mayor Daniels of Walkerville, and others comprised the delegation.

Should no reciprocal arrangement be reached by international negotiation or other means, the delegation favored the passing of similar restrictions by the Dominion Government which would deny right of entry of all but American-born citizens to Canada. All employees not possible of United States branches would be deported. The delegation recommended this action under the alien contract labor clause.

Soviet Hotel Released From Police Guard

Supervision of Delegates to Geneva Has Been Relaxed

Geneva—According to the request of the Soviet economic conference delegation for lightening of the police influence to which they have been subject since their arrival, the Swiss authorities have removed the uniformed police guard from the lobby of the Russian hotel.

The authorities also consented to removal of the wooden barriers erected in front of the hotel, designed to keep out the public and to discontinue supervision of telephone calls for the Russians.

The delegates say the Russians thrivaten to abandon the economic conference and leave Geneva unless the police surveillance was relaxed.

Whale Wrecks Cable

Washington.—A whale which interrupted traffic on the Alaska cable early in April chewed up so much of the cable that an 80-foot replacement was necessary to restore communication, a report received the war department and made public today said that when the cable ship Delwood reached the scene she picked up the cable, a 20-ton whale, 28 feet long and about 12 feet in girth, was found trapped in coils of the cable and had become wound about its lower jaw and tail.

Barely Escapes Train Wreck

Seville, Spain.—Only a few minutes after the royal train bearing the Prince of Wales and the Spanish sovereigns to Madrid had passed the point, a train wreck occurred at the station of Palma Rio. Two persons were killed and four injured when the Andalusia express collided with a freight train.

Undertakes New Duties

London.—Lord Lovat, who has had a distinguished military career both in the South African and the Great War, has undertaken the duties of parliamentary under-secretary for the Dominion, which office includes the chairmanship of the overseas settlement committee.

French Cruiser Launched

Brest, France.—France's new 10,000-ton cruiser Suffren, constructed in accordance with the Washington naval accord, has been launched. The vessel has a speed of 32 knots, carries three hydroaeroplanes and possesses powerful anti-aircraft battery.

W. N. U. 1959

Wedded to His Post

Premier Ferguson of Ontario Has no Designs on Federal Office

Cookstville, Ont. — "I have no designs on any public job." Premier Howard Ferguson stated in an address here to Peel County Conservatives gathered to compliment to Colonel T. L. Kennedy, member of the Legislature, and Sam Charters, member of the Dominion House.

The Premier made the statement so he said, to lull the suspicions of the "would-be" young gentlemen of the Tory party who had read in recent speeches of his the "mixed purposes" of making overtures to Ottawa.

Before he addressed the speaker made another reference to the subject. Following a review of his policy of developing "new" districts "away back," and of making life brighter for the youth born under propitious landscapes, the Premier added:

"Things like these are what wed me to the Province of Ontario and his servitude. I should not wish wider fields where I would not be as happy and contented."

Cruiser and Subs for Sale

Formerly Part of Canadian Navy Are Now Obsolete

Halifax, N.S.—Tenders are being called by the Canadian naval service for the purchase of H.M.C. cruiser Aurora, and two submarines, Nos. 4 and 5, now considered obsolete, formerly a part of the Canadian naval navy. The cruiser and submarines have been laid up at the dockyard here for some years, and are to be thrown open for the inspection of prospective purchasers. Tenders close on May 15. The Aurora and the two submarines were presented to Canada by the admiralty shortly after the conclusion of the war.

Moslem Women Revolt

Fifteen Thousand in Parade Burned Veils in Public Square

Moscow.—Thousands of Moslem women in Russia Turkestan seized the May Day celebrations as an opportunity to declare a revolt against the veil, the veil, say advices received from Samarkand.

Fifteen thousand women paraded unveiled in Samarkand. An effigy, it is the presence of 25,000 persons, the defiant women threw their veils in a heap in the public square and burned them amid cheers and groans from the spectators.

At Khokland 150 veils were burned.

More Letters Written

Reduction in Postage Rates Increases Volume of Mail Matter

Ottawa. — The establishment of penny postage in Canada has had the effect of cutting down the revenue derived from stamps, but has increased the volume of mail matter.

The revenue from letters prior to the reduction was $1,500,000 a year, roughly $18,000,000 per year. The reduction from three to two cents applied to the same volume of mail matter would therefore cut the receipts by $6,000,000. The showing, however, promises to be much more favorable.

B.C. Horses for Russia

Victoria.—British Columbia horses will be shipped to Russia as a result of plans announced by Russian purchasers who arrived in Kamloops to confer with local horse breeders. A report received this week by the department and made public today said that when the cable ship Delwood reached the scene she picked up the cable, a 20-ton whale, 28 feet long and about 12 feet in girth, was found trapped in coils of the cable and had become wound about its lower jaw and tail.

Makes New Air Record

Scottsdale, Ills.—A new world's altitude for free balloons was apparently established by Captain H. S. Gray, who ascended approximately 41,000 feet according to the barometer reading. The previous record of 35,433 feet was made 26 years ago by two German aeronauts.

Consul General to Retire

Ottawa. — Hon. John G. Foster, United States consul-general at Ottawa for more than 23 years, is retiring July 1 of this year, it was made known here. It is understood his successor has been selected but not as public announcement of his name has yet been made.

Carillon Being Inspected

Ottawa.—The carillon bells and clock for the Victory Tower in the Parliament Buildings are now being inspected at Croydon, England, on behalf of the Canadian Government, by Lt.-Col. Dr. Dowdeswell Acadamy, N.Y., commercial expert.

A National Policy

Blackpool, Eng.—That a national policy on emigration and birth control was urgently required, was the tenor of a resolution passed by a majority by the Women's National Liberal Federation in convention here.

Cattle Law Not Authorized

British Cattle Men Protest to Government Against Delay

London.—A number of resolutions passed by borough councils, protesting against the delay in applicating importation into Britain of non-tubercular Canadian cows and heifers, have been received by the Government.

This was the reply to questions in the House of Commons made by Sir Harry Barnston on behalf of the Minister of Agriculture.

Sir Harry further said the minister had not the slightest intention of altering the decision not to permit the admission of non-pedigreed breeding cattle from Canada.

The speech referred to the opinions of Chief Medical Officers and chief veterinary officers to the effect that it was very dangerous to introduce Canadian heifers to Britain because they were much more prone to tuberculosis than British heifers. Another member asked whether the understanding reached at the 1923 Imperial conference was that the importation of pedigreed cattle for slaughter, or pedigree stock and not cows and heifers.

Will Attempt Return Flight

British Airman Plans Trans-Atlantic Trip in Ordinary Seaplane

London.—The Evening News says that within the next few weeks one of the best known British airmen will attempt to fly to Canada and back in an ordinary seaplane.

Besides two pilots and a navigator, the plane will carry a passenger who will pay his own fare.

It will be the first east to west air trip between Europe and North America, the first return flight and the first passenger-carrying flight, the paper says.

The outward trip will be by way of the Azores, where the plane will refuel. The return from Montreal will be direct to England.

The name of the airman is not given and the paper says all plans are being kept secret.

DEBT PAYMENTS HEAVY DRAIN ON GREAT BRITAIN

London. — Expressing great misgivings because of the divergence of views and lack of agreement of settlement growing up in regard to the war debts, the British Government, in a note to the United States, challenged the accuracy of the statement of March 17 by Andrew W. Mellon, secretary of the United States treasury, that Great Britain's debt payments to the United States will not constitute a drain on British economic resources.

Citing what the British Government regards as errors and inaccuracies in Mr. Mellon's statement, the note expresses "trust that the United States Government will take steps to correct the impression which this has been created" by the issuance of Mr. Mellon's statement.

The note, which was delivered to Secretary Hughes Sunday, by H. G. Chilton on behalf of Ambassador Howard, who is absent from Washington, takes up in specific instances of Great Britain on war debts as mentioned by Secretary Mellon in a letter to John G. Hibben, president of Princeton University in reply to a statement by Dr. Hibben and 116 members of the Princeton faculty. This latter statement endorsed the open letter of the faculty of political science of Columbia University, suggesting reconsideration and revision of the debts settlement made with the former allies of the United States.

PLAN EXCHANGE OF GREETINGS FOR DOMINION DAY

Ottawa.—Acting on behalf of the national committee for the celebration of the jubilee of Confederation, Hugh Hoy, Senator George P. Graham, chairman, is arranging for a unique exchange of greetings, which will serve on July 1 to emphasize the unity which exists throughout the Dominion. The committee in the first place urges that on the morning of Dominion Day, wherever celebrations are held, the message of His Majesty the King shall be read. In addition, Senator Graham has suggested to His Excellency Viscount Willingdon that there be an exchange of telegraphic greetings between himself and the Lieutenant-Governors of the provinces. To the suggestion His Excellency has cordially acquiesced as have the Lieutenant-Governors.

In order that the chain of greetings may be complete it has also been suggested that the Lieutenant-Governors exchange greetings with each other, and that there shall further be an exchange between Premier King and the Premiers of the nine provinces of Confederation.

Begin Hike Around World

Second Trip For New York Man Will Occupy Ten Years

New York.—Marcus Darrow, hiker who has made the journey around the globe afoot started another, accompanied by a shepherd dog.

Darrow hiked from 1912 to 1927 to make his first trip. He plans to spend 10 years on the second. Man and dog carry packs on their backs and sleep in the open every night. The dog wears shoes.

They will go first to Canada and then to Alaska, traversing China, Japan, India and Persia, not returning until they have visited every country in the world. Darrow's philosophy has been laid by Sir Richard Cartwright many years ago with such an annuity scheme. The Liberal leaders of liberalism in Canada had since developed the idea until the logical outcome must be a universal insurance scheme.

Whaling Fleet Prepares

North Pacific Fleet Conditioned for Season's Operations

Victoria.—The North Pacific whaling fleet is now being conditioned for the summer's hunting expeditions off the coast of Vancouver Island and Northern British Columbia and it is expected that the first of the vessels will be at sea, scouting for the giant mammals.

Early in May four of the little steel steamers of the Consolidated Whaling Company's fleet will leave port on their journey to the north. The whaling operations at Queen Charlotte Islands, and a few days later the Nootka station will be opened with two more craft operating out of that port.

Brandon Flood Sufferers

Winnipeg. — Flood sufferers who were forced to abandon their homes along the Assiniboine River, when the Assiniboine River overflowed its banks, will be aided by the Manitoba division of the Red Cross. After investigating conditions at Brandon today, Major J. W. Forbes, provincial Red Cross commissioner, has said a sum of money would be set aside for the flood victims.

Goes to Privy Council

Victoria.—Decisions of the three Canadian courts declaring the British Columbia fuel oil tax unconstitutional will be appealed to the Imperial privy council by the provincial government in July, it was announced in Victoria. Leave to take the case to higher court in the British Empire was called here by the Privy Council this morning.

GOVERNOR-GENERAL VISITS WINNIPEG

His Excellency Viscount Willingdon, Governor-General of Canada made his first official visit to Winnipeg on Saturday afternoon, April 23rd, and received an enthusiastic reception from thousands gathered in front of the station of the Canadian National Railways and lining both sides of the route along Main Street to the City Hall.

The photograph shows the vice-regal party on the platform of the station immediately after the arrival of the train. Front left to right those in the group are Viscount Willingdon, Lady Willingdon, and His Honor T. A. Burrows, Lieutenant-Governor of Manitoba.

Canadian Press Offices

Directors for Ensuing Year Elected at Toronto Meeting

Toronto — The annual general meeting of the Canadian Press held here, elected directors for the ensuing year as follows:

Maritime—W. H. Dennis, Halifax Mail; Howard Robinson, St. John Times-Globe.

Ontario and Quebec—Henri Gagnon, Quebec Soleil; John Scull, Ottawa Citizen; H. J. Archibald, Montreal Star; E. Norman Smith, Ottawa Evening Journal; H. W. Anderson, Toronto Globe; W. H. Dixon, Toronto Mail and Empire; W. H. Preston, Brantford Expositor; A. R. Ford, London Morning Free Press.

Manitoba—E. H. Macklin, Manitoba Free Press; M. E. Nichols, Winnipeg Tribune.

Saskatchewan — Binford Hooke, Regina Leader.

Alberta — J. H. Woods, Calgary Herald.

British Columbia — F. J. Burd, Vancouver Province.

At a subsequent meeting of the newly-elected board of directors, officers for the year were reelected as follows:

Honorary president, E. H. Macklin; president, J. H. Woods; first vice-president, Jean Nicholls; second vice-president, Henri Gagnon; general manager and secretary, J. F. B. Livesay.

Developing Idea of Universal Insurance

Vancouver Liberal Believes System Will Soon Be Leading Plank of Party

Vancouver, B.C.—Prediction that within a short time the outstanding policy of the Liberal party of Canada would be that of universal compulsory public insurance covering not only old age pensions but also maternity benefits, invalidism and loss of employment, was made by Captain L. A. McKenzie, M.L.A., in addressing the Vancouver South Liberal association. The Liberal position on this policy has been laid by Sir Richard Cartwright many years ago with such an annuity scheme. The Liberal leaders of liberalism in Canada had since developed the idea until the logical outcome must be a universal insurance scheme.

Will Set Fruit Prices

Selling Method of British Columbia Board Should Benefit Consumer

Winnipeg.—Prairie housewives will pay no more for their fruit this year than in 1926, it was declared here by M. Black, former provincial treasurer, and now chairman of the board of control, who left for the coast to confer with fruit growers. Prices for all British Columbia fruits and vegetables and juice licenses to the Prairie Provinces, who has just returned from the Coast, said the scientific method of selling under the British Columbia board should benefit the consumer. The fruit growers of the Coast were solidly behind the new scheme, he said, since they believed it offers a way out from their difficulties caused by years of disorganized marketing.

Exhibit From B.C.

Ottawa. — British Columbia, home of the champion, of all champion bears, in addition to a bird almost as one thousand strong to the world's poultry congress at Ottawa this summer.

HON. J. A. ROBB STARTED LIFE AS A MILLER'S BOY

Kingston, Ont.—Hon. J. A. Robb, Minister of Finance, today was in a mood of confessions. He told the students of Queen—where he received the honorary degree of LL.D.—how narrowly he escaped becoming a preacher and how, as a miller's boy, he once took toll of the farmers' grist.

"At the age of 16," said Mr. Robb, "I was foolish enough to leave the high school, after completing the third offer of my father's friend, a clergyman, who, having no children of his own, offered to pay all my expenses through Queens, providing I would agree to enter the ministry and become a preacher. But I did not lean that way, and although I do now that I was not good enough to preach the gospel to others. And so I left the farm with its drudgery and its joys, its drudgery and its great independence, to learn a trade and make a living in a dusty miller."

Mr. Robb related the story of another chapter. "During the first years in the mill," he went on humorously, "my duty was to sweep the floors and toll the farmers' grists. Now my duty is to toll the taxpayers of Canada and sweep in all the tolls they can get."

Mr. Robb urged that in their send ses of national problems, the students of Queens should give human nature more than geography and statistics.

He pressed that national unity was the special duty of jubilee year, that all should work for a greater and better Confederation — a Confederation free not of land but of people.

Tells How Farmers Have Been Benefitted By Western Wheat Pool

Want "First Canadians" To Help Celebrate

Indians and Eskimos Will Take Part in Jubilee of Confederation

Ottawa.—It is anticipated that Indians and even Eskimos will in many parts of Canada take a prominent part in the forthcoming celebration of the jubilee of confederation.

It is regarded as highly desirable that as many of these "first Canadians" as possible shall take part in the celebration of the 60th birthday of Confederation. All applications from local committees for participation by the Indian people will be considered by the department, it is said.

Excepting in the more or less settled points at Aklavik, Arctic Red River, and Fort Simpson on the Mackenzie, it is not expected that the Eskimos will take much part.

The suggestion thrown out by the national committee for the celebration that a maple tree be planted on July 1 at every point where celebrations are held is meeting with lively response. Already a very large number of committees have the matter in hand and are selecting the most suitable spot for the planting of "confederation trees." The practice, it is believed, will be widespread.

Regain Nationality By Year's Residence

Special Provision for Canadian Born Persons Naturalized in States

Ottawa. — Canadian born persons who have been naturalized in the United States and have returned to Canada may now be re-admitted to British nationality after one year's residence in the Dominion.

Former Canadians, however, must show that their absence from Canada was not with the intention to reside in Canada by acquisition of property in this country or by the formation of an affidavit or statement that they propose to stay here.

This is the gist of an order-in-council making a special provision in respect to Canadian born persons who have become naturalized in the United States.

Under the old provision of the Naturalization Act, five years' residence in Canada after naturalization before readmission to British nationality could be granted.

Season Late in B.C.

Fruit and Vegetable Growers Are Worried Over Weather Conditions

Vancouver. — The Province says: "Lateness of the season is beginning to cause uneasiness among fruit and vegetable growers.

"It is pointed out that last year they began packing gooseberries during the first week in June and continued afterward with cherries and then strawberries.

"This season, with nearly a week of May gone, there is practically no progress being made in the development of the fruits. Little growth has taken place inside the gooseberries and even though warm weather were to come immediately, the ripe crop would not be available until toward the end of June.

"The lateness of the vegetable crop is being viewed with the same concern and fear of the soft fruit growers."

Represents King, Not Government

Cape Town, South Africa.—Replying in the House of Assembly to a question by General J. C. Smuts, leader of the South African Party, Premier J. B. M. Hertzog announced that in accordance of a resolution passed at the Imperial conference, the governor-general of South Africa from July 1, 1927, would cease to act as the representative of the British government and become merely the representative of the King.

U. S. Government Will Provide Credit To Assist Agriculture

Kansas City, Mo.—Unlimited credit at low rates of interest payable over a long period—25 or more millions from the federal government for cooperating marketing of grain—that was the alluring picture presented by William Jardine, federal secretary of Agriculture, in his address before the international wheat pool conference banquet here. The delegates cheered the remarks wildly.

"Whenever you are ready and know what you want, come to Washington and ask for 25 or more millions at a low rate of interest to be paid back over a long period of years so that you do not have to go to the banks time and time again. You will have no trouble in getting it. Do not worry, but come to Washington," he urged them.

"These were the words of the head of the agricultural department of the United States Government, Jardine continued.

"I say to you this administration is anxious to help you but you must know where you are going and what you want.

"You can see what progress our friends in Canada have made. We at Washington are willing and anxious to help you solve your problems but don't talk of a world wheat pool selling agency until you see your house in order. You have complete access to all the machinery the Canadian pool members have worked out. You can profit by their experience. You are in a position to bring you from Washington tonight."

Kansas City, Mo.—Benefits which have accrued to the farmers of Saskatchewan through the formation of the Saskatchewan Wheat Pool were outlined to the international wheat pool conference here by Premier James G. Gardiner of Saskatchewan, in a speech which was well received. The Premier also suggested that the pooling system might be of great benefit in other parts of the continent.

"Measured by cost of shipment and percentage of crop which it represented, Saskatchewan is farther removed from its market than any other of the great wheat producing areas of the world. We are one of the great wheat producing areas. The province of Saskatchewan has produced as much as 21 bushels per acre of wheat in one year with a population of 800,000 and an acreage of 12,700,000. That is an average of 1.6 bushels per acre or 240 bushels per head of population. Of that amount, 241,500,000 was exported from the province, the greater part of it going to Liverpool. The total exportable surplus of the United States during that same year was 150,000,000 bushels. With our 800,000 people we produce more than one half or all the wheat grown in the Dominion of Canada, and every bushel of it is hard spring wheat.

"About 80 per cent. of our farmers and about the same percentage of our acreage is turned up in the contract wheat pool. Ever since the wheat pool was formed I have maintained that my own wheat is in the pool. The government has signed up the institutional farms in the pool. In the province of Saskatchewan we add to the contract pool and their Premier and Government agree with them that the wheat pool is being about prosperity within our province.

"Whether the wheat pool remains the permanent method of marketing wheat or not, it has proved a God-send in the form of a standing influence in the province of Saskatchewan. It has entered to be built into the future with a renewed optimism and a split based upon the confidence inspired by having done something worth while for ourselves."

Heads Grain Board

Leslie H. Boyd Appointed for Another Period of Ten Years

Ottawa. — On the recommendation of the Minister of Trade and Commerce, the Governor-in has appointed for another period of ten years Leslie H. Boyd, B.A., chairman of the Board of Grain Commissioners with headquarters at Port William. Mr. Boyd's salary is fixed at $10,000 per year. Before being in that position in 1917, Mr. Boyd was a prominent lawyer in Montreal.

Some efforts to have him replaced by a western politician were made some weeks ago, but were not entertained and the re-appointment was not unexpected.

Reopening Rheims Cathedral

Paris.—The Rheims Cathedral is now completely restored and will be reopened for religious services on Sunday, Dec., May 26th it is announced.

Solemn high mass will be conducted by Cardinal Dubois in the presence of a delegation from the committee which administered the gift from John D. Rockefeller, Jr., and from the French and Belgian societies who contribute1 financially toward the reconstruction work.

Trade Union Bill

London.—Amid an attempt by the Laborites to call "John Bowes's body," which was stopped by a sharp reprimand from the Speaker, and the chanting by Laborites in the lobbies of "Hands off Scotland," the House of Commons passed the second reading of the Trade Unions Bill, which aims to prevent general strikes and strikes of a coercive nature.

Not Allies

Nothing But Close Friendship Between Britain and United States

Formal addresses have now been made by the British Ambassador to the United States and by the American Ambassador to Great Britain — almost identical in tone—deprecating strongly the suggestion that there should be a British-American alliance.

Both Ambassadors dwelt with emphasis upon the great wisdom and priceless worth of the closest possible friendship between these two nations. Friendship and that alone, standards are at least as similar as their language. To neither can we bring anything but devotion, loyalty and to both peace is a paramount interest. An intimate and permanent mutual understanding is the best insurance that either can have against danger and the firmest guarantee of world-peace that can be given to humanity today.

But an alliance would be regarded by the rest of the nations more as a challenge than as a guarantee of peace. They would be very likely to regard it as an effort to impose an Englishspeaking hegemony on the human race. There would be in the most powerful political entities in the world linked together in a formal military and naval alliance, with loyalty to all and sundry that this tremendous power, actual and potential, was ever ready to be mobilized behind Anglo-American policies.

Inevitably, it would set all other races and peoples by the ears. It would seem to be the fatal rendering of the Pan-German idea—a megalomaniac dream which had a lot to do with precipitating the world war. Bismarck told his royal master that he should walk softly after 1870, because "Europe would never stand any more" if he walk burdened as he was right. It was the Germanic challenge, cradled in the heart of Europe, which drove France and Russia together and finally brought Britain into the same orbit. Pan-Anglo-Saxonism would make the same mistake.—Montreal Star.

Getting Rid of Weeds

The Different Methods Followed for Eradication

The prevalence of weeds is a great drawback to farmers throughout the country. They rob the soil of plant food and of moisture, thus increasing the effects of drought by taking up water from the soil and wasting it by evaporation. Being hardier, and as a rule more prolific than the useful plants, they crowd them out. They increase the cost of every farm operation and cause depreciation in the market value of crops, and their eradication is costly in labor, time and machinery. It therefore behooves every farmer to get as much knowledge as he can of the nature of the weeds with which he has to contend, the ways in which they are spread, and how to protect himself against them. All this information may be found in a bulletin of the Dominion Department of Agriculture on "Weeds and Weeds Seeds," distributed by the Publications Branch of the Department, Ottawa. The bulletin tells how weeds are introduced on the farms with grass, clover and other commercial seeds and feeding stuffs, and how they are spread from district to district by railways and other means of transportation, by stable manure and threshing machines, and how they are disseminated in many other ways. Of the different methods of eradication which once the weeds are established, summer-fallowing has proved to be the most generally satisfactory, but the amount and nature of the cultivation of a summer-fallow depends on the habits of the particular weeds, on the kind of soil and climatic conditions. Using intertilled crops may be substituted for summer-fallow under favorable conditions, and systematic rotations requiring thorough cultivation are profitable methods of control. Seeding to grass for hay and pasture is often a useful method of getting rid of weeds, especially annuals.

Old Turtle Found

Was Tagged 37 Years Ago in Marsh Near Hamilton, Ontario

The Dundas marsh near Hamilton, Ontario, has yielded another curiosity which is the form of a large turtle which bore on its shell a small copper plate, which showed the turtle had been caught in 1890 by Mr. Franks, Burlington street, and again released. From what can be learned the turtle was quite small when Mr. Franks caught it 37½ years ago. It is now two foot long and sixteen inches across the wide part of its back. It was caught the last time by Bert Duckworth, who lives on the shore of the marsh.

Jerry—"You have heard of the fight between David and Goliath?"

Mac—"I don't read the sport page, but if it's some more scandal let's hear."

Charity consists of gifts. Probably that is why a gift thinks it is charitable to give her rival's age away.

The most intricate step, and the one requiring the most lively music, is known as footing the bills.

One of World's Best Libraries

Valuable Collection of Books and Manuscripts at Windsor Castle

One of the most famous of royal libraries in the world is the library at Windsor Castle, says a writer in T. P.'s Weekly. The library was founded by William IV., who lived entirely at Windsor Castle. "I am the only monarch in Europe," he said, "without a library, and I am going to have one now."

This was shortly after his accession. Spacious rooms were chosen for the library, and a start was made in setting it up by taking the books and manuscripts then at Carlton House to Windsor. These books numbered about 20,000; the library now contains 150,000 volumes. There is also to be seen in it what is now one of the most interesting and valuable collections in the world of drawings by some of the greatest masters, such as Raphael, Leonardo da Vinci and Michael Angelo.

The library was not much used by the late King for reading purposes, but the present King derived a great deal of his considerable and accurate knowledge of history from the Royal Navy from the splendid collection of books on that subject in the library. Many record books may be read in this famous library. The late Czar, the ex-Kaiser and the present King of Italy have spent many hours there. A beautifully illuminated edition of the life of Benvenuto Cellini — it is an autobiography—had a great interest for the King of Italy. There are rarer and more valuable books in the library, but they are kept in the safe and coveted so much. It is the rule that books are not to be taken out of the library, and members of the royal family are requested to observe it. The ex-Kaiser is probably the only person who has violated the rule. He took with him to Holland a book of Prussia, were taken by him to his private apartments when he was King Edward's guest.

Modern Planes to Map Straits

Canadian Aviator Takes One to Washington for Exhibition

Canada's contribution to the all-American aeronautical aircraft display at the exhibition will be Flight Lieut. A. A. Leitch, of the Canadian air force, arrived at Wash ington from one of the Fokkers constructed for the Hudson's Straits patrol. Leitch arrived just four hours after leaving Hasbrooke Heights, N. J.

The plane was flown from New Jersey by Lieut A. A. Leitch, of the Royal Canadian Air Force. It is equipped interchangeably with wheels, pontoons and skis. It is of the cabin commercial type and will carry a crew of three, including the pilot. On their exploration and mapping expedition in the region of Hudson's Bay and Hudson's Straits this summer, the six 'planes will be equipped with cameras and wireless apparatus and will have a cruising radius of about 700 miles.

Aircraft ranging in price from $5,000 to $40,000 and in design from the Fokker to the Curtiss bullets, various cabin 'planes was on display The United States Army and Navy will be represented by a special display along with the leading commercial 'plane manufacturers and the post office department was represented by a display showing the operation of the trans-continental mail system in model and in photograph.

Shoes of First Century

Leather Soles With Low Heel Unearthed in England

Leather soles of shoes belonging to the Roman women of Londinium in the first century A.D. are among the interesting discoveries at Foundress Court, Lothbury, E.C., recently, archaeologists are prosecuting with the banks of the River Walbrook near the Bank of England.

Small and polished as are modern shoes, these leather fragments, embedded in the mud of the old Walbrook, have survived the ravages of time to show that the leather of which was a proud of her footwear as is her modern sister.

These soft soles have been found and none of them is worn in the slightest degree, apparently indicating that the owner had discarded them after a pair of holes.

The high heel had not yet made its appearance, for one of the women had a low heel, something like a rubber one, still fastened to the leather.

Pays Old Debt

Jim Dubsoe, who left Tuscaloosa, Alabama twenty-five years ago for Birmingham, drew nothing for his two-room cabin, has just returned, bent with age and has repaid J. W. Hatley a sweet little bill of a few dollars for groceries he purchased a quarter of a century ago.

The Jefferson Bible is a work of 46 pages compiled by Thomas Jefferson of passages from the four Gospels cut out and pasted together in a single story.

A man without a single idea is less of a bore than a man with only one idea.

A man often loses lots of money experimenting with schemes to make money without work.

Causes More Deaths Than Tuberculosis

Pneumonia is Highly Infectious But to Large Extent Preventive

Pneumonia was known to the ancient Greek physicians, and was sometimes confused by them with pleurisy. Down through the centuries it has continued to be one of the most dreaded diseases and today it causes more deaths than tuberculosis. It ranks among the four most common causes of death, in spite of the fact that it is to a large extent preventable. It is caused by a germ, which germs are several types, and is communicated from person to person, in much the same manner as any other infectious disease. It occurs at all seasons but is more prevalent in this country during the winter and early spring months. Influenza, measles, whooping cough, etc., and alcoholism, are predisposing causes of pneumonia. It is always a serious disease and is very fatal. During 1918 the percentage of deaths to cases ranging from 20 per cent. to 50 per cent.

It is believed that pneumonia is infectious, very prevalent, and frequently fatal, it behooves us to use every means at our disposal to prevent it. Attending to the following rules will give good returns in health. 1. First of all, do not regard a cold lightly. Neglected colds lead to many infections lightly. Always obtain competent medical advice on the advent of any illness. 2. Always see that you are properly clothed and protected against cold and rainy weather. 3. Avoid draughts, sudden chilling of any part of the body, and do not overheat your homes and always provide sufficient ventilation to keep the air fresh. 4. Avoid contact with people ill with influenza, colds, etc. 5. Avoid the lowering of resistance to infection by fatigue, loss of sleep, or other causes, insufficient food and excesses of any kind. 7. Keep the hands clean and avoid shaking hands with persons suffering from colds as this is a common mode of transference of germs. 8. Destroy all food intended to be eaten uncooked. 9. Shun the common drinking cup and common towel. 10. Avoid crowded places, particularly during epidemics of "flu," colds, etc.

A close observance of these directions will not only lessen your chance of contracting pneumonia, but will materially aid in protecting your neighbors from infection. Remember the old adage, "An ounce of prevention is worth a pound of cure" and in observing this you will not only protect yourself but others with whom you come in contact.

Experiment Worth Trying

Nevada Uses Magnets to Clear High Ways of Nails

Profiting by the success of other states, Nevada is clearing roads of nails, tacks and bits of iron and steel, the maintenance engineer of the Nevada State Highway Department has announced. All Nevada trucks of these hazards to safe and happy automobile driving. Says The American City Press:

"Two 22-inch lifting magnets were suspended between the front and rear wheels of a truck, and when their faces raised five inches above the surface of the roadway. Magnetizing current was supplied to the magnets from a small direct-current generator driven by a gasoline engine, the engine and generator being mounted on a truck in the rear. This outfit was first given a tryout over an old railway grade which is being used temporarily as a highway between Reno and Lovelock. Maintenance operation of this grade had caused the track spikes to come to the surface in great numbers, contaminating punctures and ruining automobile tires. In one round trip on the Lovelock road, 300 pounds of nails, spikes, and scrap iron were picked up. An examination and count of this large material disclosed the startling fact that on this section there had been a per-mile average of forty-five pieces of sharp iron scattered on the surface of the roadway just waiting the opportunity to puncture and possibly ruin the tires of unsuspecting motorists. After such remarkable success on the Reno-Lovelock road, the magnets were used to clean the streets in Carson City. Over 4,500 pounds of nails and other puncture causing materials were picked up in two days. The car had a low body, something like a rubber one, still fastened to the leather.

"Small and polished as are modern shoes, these leather fragments, embedded in the mud of the old Walbrook, have survived the ravages of time to show that the leather of which was a proud of her footwear as is her modern sister.

These soft soles have been found and none of them is worn in the slightest degree, apparently indicating that the owner had discarded them after a pair of holes.

The high heel had not yet made its appearance, for one of the women had a low heel, something like a rubber one, still fastened to the leather.

Pays Old Debt

Jim Dubsoe, who left Tuscaloosa, Alabama twenty-five years ago for Birmingham, drew nothing for his two-room cabin, has just returned, bent with age and has repaid J. W. Hatley a sweet little bill of a few dollars for groceries he purchased a quarter of a century ago.

The Jefferson Bible is a work of 46 pages compiled by Thomas Jefferson of passages from the four Gospels cut out and pasted together in a single story.

A man without a single idea is less of a bore than a man with only one idea.

A man often loses lots of money experimenting with schemes to make money without work.

Canadian Sheep Exports

Breeders Are Reaping Reward of Raising Prize-Winners

Partly as a result of Canadian sheep exhibitors winning more than eighty per cent. of the championships, reserve championship and first prizes for sheep at the International Live Stock Exposition at Chicago in the last few years, breeders of pure bred—sheep in Canada are now enjoying an additional measure of reward. Shipments of breeding stock of pure bred sheep raised in Canada are being sent to several countries, the largest orders coming from the United States, Jamaica and Russia.

Sheep breeders in other countries have found that the climate in Canada is a helpful factor in producing a hardy strain, consequently increasing the animals' resistance to disease.

The demand for Canadian sheep from different parts of the world began to show a decided gain about five years ago. Since then it has been increasing each year so that now there is a good market for all the more choice animals and the prospects are that the demand is likely to become more active.

Round-up of Wild Horses

Roving Bands of These Animals in British Columbia

Hundreds of wild and vicious stallions which roam the ranges of the Chilcotin district, British Columbia, heading bands of wild horses, are being destroyed by cowboys under government supervision now. Big round-ups of these animals will take place at many points in the interior during the next few weeks and the number destroyed will be a material to the stock industry, will be shot.

These roving bands not only interfere with the work of the legitimate domestic horses away from ranches. Alberta agricultural interests are considering the advisability of importing large numbers of pure bred sires in an effort to breed a horse for fertilizer purposes, it is announced by the department of statistics. Roundups of horses for this purpose in the Okanagan Valley are under consideration now.

Declares Story a Myth

London's Lord Mayor Says Whittington's Cat Never Existed

History won't vouch for a cat that ever chased Dick Whittington, says Sir Rowland Blades, lord mayor of London, shocked traditionalists by announcing in a speech. The cat which is supposed to have brought his predecessor, Sir Richard Whittington, fame and fortune, never existed, Blades declared.

The lord mayor said he had been searching the records and had failed to find any reference to the cat in connection with the event. The story of Dick Whittington's cat he added, has been traced to an Austrian source, two centuries later and truth must prevail over sentiment.

"How did the Smith wedding come off?" "Fine until the preacher asked the bride if she'd obey her husband." "What happened then?" "She replied, 'Do you think I'm crazy?' and the groom, who was in a sort of daze, replied, 'I do.'"

An attorney who advertised for a chauffeur, when questioning a negro applicant said: "How about you, George; are you married?"

"Naw, sir, boss; naw, sir; makes my own livin'."

The easiest road to wealth is to have a rich relative die and leave you a fortune.

Indian Stone Mirror

Interesting Relic of Early Days is Found in B.C.

While there may not have been beauty parlors in pre-historic days, the Indian braves and belles who inhabited what is now Central British Columbia, had their own methods and appliances for enhancing their charm. The "rouge and cosmetics" used were obtained from natural coloring materials, but a recent discovery shows that hand mirrors also existed in those days. The discovery was made by a Dominion archaeologists' party. In the pre-historic part of the ancient Gitlanan village site immediately below Hazelton, of one of the extremely rare stone mirrors known to have been used by the Totem Pole Indians of the Skeena Valley area.

The specimen is a thin slab of black stone, one end of which is tapered for a handle and the other end has its flat surface highly polished. One of the older Hazelton Indians demonstrated the ancient archeologists how this was used. The mirror surface was wet and when this is done the polished surface becomes a perfect reflector, human face so clearly that individual hairs and the color of the eye are discernable.

This Indian stated that such mirrors were used by the Indians when they were "making up" their faces for tribal dances and ceremonials in the days before the white man introduced the present looking glass. The specimen secured is being sent to the provincial museum at Victoria for the preservation among the prehistoric Indian relics.

A Bit of Canada in England

Lady Byng Grows Canadian Flowers on Her Estate

Over 1,500 different Canadian plants and shrubs have been planted at Thorpe Hall, near Clacton-on-Sea, by Lady Byng, recently visited by Canada, Viscount Byng, resides with Lady Byng. Since their return to Thorpe, Lady Byng has made wonderful changes in the grounds in front of the house. She is an enthusiastic gardener, and a "Daily Express" representative found her busy in the grounds.

There is a large lake, where various Canadian water fowl are kept, making themselves at home. Not far away a noisy waterfall feeds two smaller lakes, and gorgeous little islands and natural haunts make up a beautiful picture. Everywhere there are strange and perfect plants, some taken from the Canadian prairies and dropped into quiet Essex soil; some sent by Canadian friends, and many brought by Lady Byng herself from Canada.

The much-talked-about swamp from here is not entirely yet. Workmen are coming from Ontario, and a miniswampy piece of ground awaits their arrival.

Walking among the trees one constantly sees nesting boxes conveniently placed.

Saskatchewan Swine Clubs

Mr. Brookelbank, swine club organizer in the Saskatchewan Department of Agriculture, gives the following list of swine clubs in Saskatchewan, for 1927. Bridgen, Carrot River, Briercrest, Crosswarde, Fairlight, Kisbey, Kennedy, Lac Vert, Marcelin, Manor, Moosomin, Melfort, Park man, Perdue, Prince Albert, Rosthern, Roulcau, Shellbrook, Toge, Tisdale, Tuxford, Wiston, Whitewood and Yorkton. In addition, there are seven clubs likely to be organized at Belle Plaine, Calder, Foam Lake and Lemberg.

Horace: "May I marry your daughter, sir I can't live without her!"

Pork: "Take her mother, too. I can't live with her!"

CANADA LOOKS GOOD TO THEM

Here is a typical group of practical farmers and their families from the United States who have removed bag and baggage into Western Canada, which, as one of them stated, "looks like the land of real opportunity to us." In addition to being farmers of long standing and thoroughly acquainted with all the methods necessary to ensure the successful operation of a large tract of land in Western Canada, these welcome newcomers have plenty of capital to establish themselves and also a considerable amount of farming equipment. There are three families in the photograph. Two of them leave going to the Lintlaw district, Saskatchewan and the third to the Margo district of Saskatchewan.

Last year, through the efforts of L. B. Boyd, superintendent of Colonization for the Canadian National Railways at St. Paul, Minn., 355 families such as these came to Canada and have established homes for themselves. In every case they brought with them large quantities of agricultural machinery and it is estimated that the head of every family had at least $5,000 in cash available for investment in his enterprise. On the extreme right of the picture is seen O. D. Grimley, a member of Mr. Boyd's staff who accompanied these families to Canada and saw them safely to their destinations.

A Little Tale of Home Nursing

Reformation of Living Habits Effected Through Proper Instruction

In an industrial centre in New Brunswick, a Red Cross nurse who was conducting one of the Home Nursing classes which Miss Burton has made so popular a feature of both urban and rural life in that province, observed coming in with one of the regular members, one evening, a girl who had never before attended. She was flashily but untidily dressed, painted, powdered and "gay" in appearance, but the nurse noted that had both an unhealthy and unhappy look, and a manner little short of reckless.

With this girl and others of her kind in her mind the instructor keynoted her talk that night to the connection between health and beauty. She described the really attractive girl as one with clear eyes, bright eyes, shining, well groomed hair, and an alert, wholesome mind. She pointed out that these things did not come from accident but from intelligent care of the body and mind. She stressed the need of good, properly cooked food, of drinking plenty of good milk, of avoiding over indulgence in sweets and late hours, of opening bedroom windows, of walking the natural way but not in the consuming many vegetables. In concluding her lecture she appealing to the class to try her plan if the beauty of health was desired and she particularly noticed that the flashy girl was very intent on what was said, leaning far in the press of business she soon forgot her.

But about two months later after a class had been completed she found two girls waiting for her and one of them, a fine very cheeked healthy young woman stepped to her, "O, nurse, I see that you do not remember me, but I have come to say 'thank you' to you. I came to your Home Nursing class with Miss Mary C— and you told us all about the connection between health and beauty and overcoming bad habits in a very reckless temper that night. My grandad with whom I lived had just threatened to cast me out if I did not cut out the late hours, the dances, the rouge and flashy clothes, and I had about decided to leave his home and his when I met Mary and we came along to your class in Home Nursing.

Well, when I heard you talking as you did, I began to think that grandad was not so far wrong perhaps. I was really fond of him, you know, and I thought he was a fine old fellow, only rather behind the times, I made up my mind that I would try your plan for a week and see how it worked.

"So I bought more milk and drank a pint a day, and I walked more, I opened the windows at night and kept better hours. I ate lots of fresh vegetables and tried to be sensible. Well, the end of the week I felt good, so I went right on and now just look at me! And I am a lot happier and so is Grandad, I am thinking of a nice plain man, and I think I am a much nicer girl myself than I was. I'm glad that I brought just to come and tell you."

The nurse, much cheered about her work reported to Miss Barrin, Provincial Director of Red Cross Nursing Classes in New Brunswick, that she "had made a convert," but Miss Barrington who is in the part of the province where she has organized 77 classes and has seen 1,200 women and girls enjoy and profit by the instruction given, only smiled for she knows that wherever there may be few cases of conversion so spectacular as this, there is a gradual reformation of living habits of whole communities being effected through the knowledge which is imparted to the members of her province or other parts of Canada in the Home Nursing classes.

Surplus of Women in England

Increase of Five Hundred Thousand Over Pre-War Figure

The World War has left more than 1,700,000 surplus women in England, an increase of 500,000 over the pre-war figure. It was revealed in the final volume of British census returns.

The increase over men was most marked among those women of marriageable age, there being 1,470 unmarried women between the ages of thirty and thirty-five for every 1,000 unmarried men. Much smaller families also resulted from the war, as well as a reduction in the population increase rate. Despite this, the population of England has reached 37,750,000 or one person per acre.

Must Keep Accurate Time

Experts were busy performing a most delicate task in connection with England's shift to summer time — setting forward King George's watches and clocks. There are more than 300 royal timepieces at Windsor Castle and their adjustment must be accurate to the second. The most valuable clock in the collection is the one in the turret over the state entrance to the Grand Quadrangle, which has been going for a century and seldom varies ten seconds in a week.

The man who says the right thing at the right time has perforce another merit; when he has nothing to say he keeps his mouth shut.

Some men are so mean that they even refuse to let their wives have the last word.

Forest Fire Loss Reduced by C.N.R.

Railway's Campaign of Education Results in Large Saving

A persistent campaign against forest fires throughout the Dominion of Canada brought a reduction in fire damage along the lines of the Canadian National Railways during 1926, according to W. H. Kilby, Chief of Forest Protection on the National System. During 1926, total fire damage over the 21,000 miles of the Canadian National Railways in Canada amounted to $13,522 or about 64 cents average loss per mile of track. The average burned over is shown as 6,041 acres and 426 fires were attributed to railway causes. This makes the total value of property destroyed by fire along the lines of the Canadian National System during 1926, about equal to that of a medium sized house and lot in the cities," Mr. Kilby stated, "and this reduction in losses has been brought about by constant care and supervision.

"The week of April 24 to April 30 inclusive, has been set aside as 'the Forest Week' in Canada, but in order to reduce fire dangers along our lines we have made every week during the Forest Week' on the Canadian National System.

"During 1926, it is estimated, the Canadian National Railways' bill for products of the forest amounted to more than ten and three quarter million dollars, and the cost of ties, poles, timbers and other products necessary for railway construction, repairing, building, etc., is constantly increasing as the forest growth diminishes. So far as the forests' contribution to freight revenue are concerned, it is estimated that these furnish about 20 per cent of the total tonnage handled by the railway company. Over 12,000,000 tons of woods and wood products were handled by the Canadian National Railways during 1926, and to handle these in one shipment, in ordinary trains, would require some 6,350 locomotives; nearly 2,500 miles of trackage and 32,000 trainmen.

"With this in mind, it is obvious that saving the forests during every week of the year is the duty of the Canadian National System, even if it is considered only from a selfish, financial point of view."

New Citizens of Canada

Italians Head the List of Those Becoming Naturalized

Foreign people to the number of 16,737 became naturalized Canadians during the fiscal year which closed a month ago. This is an increase of 1,294 over the corresponding period of time the last year.

The great preponderance of the new citizens come from the West, where patents to homesteads depend on residence and cultivation. Italians, however, the Italian in Canada is generally the most anxious to acquire the rights and citizenship and as soon as the five years residence is finished he is usually after his naturalization papers. Russian homesteaders and the Jewish people also are pretty prompt.

Italians headed the list last year with 4,618 new citizens. Britishers came next with 2,618, United States citizens third with 2,354, Russians fourth with 2,157 and Austrians fifth with 2,139.

Other naturalizations were: Rumanians, 1,199; Belgians, 421; Germans, 394; Swedes, 377; French, 305; Greeks, 229; Norwegians, 216; Hungarians, 162; Turks, 164; Bulgarians, 101; Japanese, 61.

Canning Fruits and Vegetables

Canning Can be Done in the Home by Simple Method

Canning is now recognized to be the most practical and economical method of preserving large quantities of fruits and vegetables for home use during winter months. "A can of fruit, a can of vegetables and a can of greens for a family of six for every day in the year that the garden is not producing is the amount allowed for every housewife in a new bulletin on "Preserving Fruits and Vegetables in the Home," just distributed by the Publications Branch, Department of Agriculture, Ottawa. The constant use of fresh and canned fruits and vegetables is of vital interest to health for each member of the family. The canning can be done in the most simple and inexpensive way with our elaborate equipment. Full instructions are given in the bulletin which contains recipes for the preservation and delicacy of all kinds of fruits, vegetables jams and jellies.

Old lady (to bus conductor):—Do you stop at the Ritz Hotel?

Bus Conductor (tersely) — No, madam, not on my pay.

Our idea of a modest man is one who can keep his opinion of himself to himself.

When in doubt a wise man gets out—if possible.

Criticism, like charity, should begin at home.

Hudson's Straits Air Survey To Undertake Hazardous Work In Northern Waters This Summer

The Hudson's Straits air survey expedition will set out from Halifax on board the Canadian government ship Stanley, early in July, according to information from Ottawa.

For the following fifteen months the Royal Canadian Air Force detachment will be engaged upon one of the most intensive and hazardous flying jobs ever undertaken in the North. It is stated, the flights across the Pole were brilliant feats, but they were in the nature of short dashes, involving some hours of endurance, but the Royal Canadian Air Force work will require fifteen months of day to day flying under all kinds of Arctic weather conditions for the purpose of observing fog and ice conditions.

During the early summer six Fokker seaplanes will be put through severe tests and conditioned for the work in the North. Nearly fifty officers and men under Flight Lieutenant Lawrence will be engaged on the work.

The planes, along with a vast amount of material including all food and clothing, fuel and building materials, will be packed on board the Stanley. The expedition will be broken into three detachments upon the arrival at the straits. One depot with twelve officers and men and two planes will be established on Nottingham Island, which is in the centre of the western end of the straits. Another depot with a similar establishment will operate from Port Burwell on the northern tip of Labrador, while the headquarters station will be at Lake Harbor, on Baffin Island, about halfway through the straits.

Powerful wireless equipment will be taken north and it is expected that an intercommunication will be almost daily touch with the Air Force headquarters in Ottawa.

The navigation part of the survey will be under the direction of the Department of Marine and Fisheries and it is quite possible that Alex Johnston, deputy minister of the department, may go north on board the Stanley in July. The Stanley, which is now being reconditioned, will possibly stay in the straits throughout the winter, but will return south late in the summer.

Parliament at the last session approved a vote of $800,000 for the survey, but unofficial estimates put the total cost nearer a million dollars. It is pointed out, however, that at the conclusion of the work there will be a substantial saving as the Air Force will have the seaplanes and the Department of Marine will have the reconditioned Stanley, which has been out of use for some time past.

The Air Force report will be made to the Government and there will results of its findings of ice and fog conditions in the strait depends much of the future possibilities of the Hudson's Bay Railway. At the other end of the Hudson's Bay route there will also be flying activities this summer. A private flying company has been taking in men and equipment from the present end of steel at Le Pas, Nelson and Fort Churchill and before the end of the summer Hon. Charles A. Dunning may look over the terminal possibilities himself by seaplane.

The Air Force expedition is quite separate from the annual trip of the Northland Steamship Company. The voyage will be carried on as usual, taking mounted police and scientists in and out of the Arctic.

A High Birth Rate

Canada Leads All the White Races of the World

Canada's birth rate leads all the white races of the world, being 28.4 to the 1,000. Saskatchewan's rate is even higher, being 34.7 per 1,000. New Brunswick alone surpasses Saskatchewan with a rate of 32.1. Saskatchewan also enjoys the distinction of the lowest death rate among the provinces, and, in fact, in the world, the figure being 8.5 per 1,000 of the population. Next to Saskatchewan is New Zealand with 8.3 per 1,000.

Americans Buy London Clothes

"Many American visitors regard their hotels as clearing depots for old clothes," said an official of a leading hotel. London being regarded as the world centre of masculine fashions, the visitors take up opportunity while there to catch up on style. Some patrons have left as many as ten suits behind them.

Sally—"No, I never would be happy if I married you. You know I always want my own way."

Ted—Well, you can go right on wanting it after we're married."

Post Office Clerk—You've put two cents too much postage on this letter.

Old Lady—Oh, dear. I only hope it won't go too far.

The will recently probated of a Massachusetts man was written by hand on a strip of paper measuring seven feet, the writing filling all but three inches of the document.

Growing Desire for Beauty

Ninety-nine Thousand Rose Trees Purchased Last Year

Each succeeding year sees a considerable contribution made to the general beautification of Canada. Evidence of this is disclosed in a recent report issued by the Canadian Government Bureau of Statistics, which states that ninety-nine thousand rose trees were purchased last year from wholesale growers in the Dominion alone.

Nine hundred thousand other ornamental trees and shrubs were bought from Canadian growers to be planted about the houses. Home-makers spent over half a million dollars for many thousands of bulbs, and of the dozen varieties of cut flowers raised by hundreds of market gardeners, they took fifteen million plants, paying over a million and a quarter dollars for them.

These figures do not include imported plants and flowers, nor those raised by amateur gardeners, a vastly greater showing. The figures are simply those of the wholesale trade, which received over a million and a half dollars from the retailers and direct purchasers.

This was the first year of the inquiry, and there are hundreds of nurserymen who made no returns.

B.C. Has Advantage in Dairying

Stock Can be Pastured Practically All of the Year

The prediction has been made by Dr. G. C. Creelman, former president of the Ontario Agricultural College, that British Columbia will become the dairying district of Canada. This is the conclusion he has made from a study of conditions on the Pacific Coast. One great advantage is that dairy stock can be pastured practically the whole of the year, whereas in Ontario they have to be fed stabled in the winter and 60 per cent of the produce of a 100-acre dairy farm with an average amount of stock had to be used for feed.

The Two-piece Frock is More Important Than Ever

This season the two-piece frock rules over a wider domain than ever. Even on many days, the best hours of its reign extend from morning to evening. Therefore, it must be correct, yet combine as well, a semi-formal charm for leisurely moments. The model pictured here is a typical example of a sports costume that will satisfy from the morning of shopping, or an afternoon of bridge. The blouse features an over the head style, the collar that may be worn buttoned high or turned back as illustrated. The front of the blouse has gathers at each shoulder and two pockets for adornment, the back being quite plain. The long set-in sleeves are gathered into tailored cuffs fastening with links. The circular skirt is in four gores and provides a soft bloused effect at the hip-line. Use for this detail will be satisfied by two box-plaits in the front. The blouse, No. 1347, is in sizes 16, 18, 20, 42 and 44 bust. The skirt, Size 36 requires 2¾ yards 36-inch figured material, with 2¼ yards plain. The suit, No. 1341, is joined to a body lining, and is in sizes 34, 36, 38, 40, 42 and 44 inch bust. Size 36 requires 1¾ yards 54-inch material; body lining 1 yard; 7 yards 39 inch contrasting.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents; the 1607.

Breeding Plants to Order

Luther Burbank in "The Harvest of the Years"

Probably I was the first man to take a specific order for a new variety of plant or tree, and to deliver that order definitely on a contract, taking an architect's blue-prints, will deliver a skyscraper or a church, a cottage or a mansion.

A good many people have not understood this. It is sometimes supposed that my experiments have been performed by following favorable lines of development, more or less accidental or fortuitous, until, by chance and some skill in selection, I have produced a new variety of plum, or poppy, or gladiolus. On the contrary, with many such accidental developments I have occurred and have been taken advantage of, most of my work has been toward a definite and exact result, and I have persisted in my pursuit of this fixed purpose until I have achieved success.

In this field of plant development there lies before the young men of the world a field of research and invention so important and so rich in possibilities that I see no limits to it. This great field is almost neglected, and the beginning of a new era for mankind compared with which mechanical invention and the discoveries of the most astounding processes fade into shadows. What Edison and Ford, and the Wright brothers, and Alexander Bell and Marconi and Steinmetz in chemistry have achieved for the world is to be equalled if not surpassed, in time, by the men who will turn their attention to the plant world and there harness the unimaginable powers that only need guidance and releasing to double the working capital of the world.

Women May Pilot Passenger Planes

International Commission on Air Navigation Has Granted Right

Women now have the right to pilot passenger aeroplanes throughout Europe by a decision reached during the first session of the International Commission on Air Navigation, held in London.

Sir Philip Sassoon, under-secretary of State for Air and chairman of the convention, in opening address, said: "We have always been accustomed to regard women as ministering angels, and we have hitherto hesitated to endow them officially with wings."

Some time ago Miss Bolland, famous French aviatrix, threatened to use the commission because she was denied the right to pilot passenger planes. She later dropped the case.

The motion was passed without a dissenting voice, women therefore winning the right to pilot planes in any country which is a member of the commission. Neither the United States nor Germany is represented.

Many Canadian Boys Receive Scout Training

Annual Report Shows Nearly 50,000 Enlisted in Dominion

There are approximately 45,000 boy scouts and cubs in Canada, with 3,400 scout and cubmasters, says the annual report of the executive committee to the Canadian general council of the Boy Scouts Association, which met at Ottawa recently. Viscount Willingdon, chief scout for Canada, presided, assisted by Dr. J. W. Robertson, chief commissioner. The meeting was representative of all the provinces.

"Since scouting began in Canada in 1908," states the report, "a great many boys of the Dominion have received scout training.

"Those are only these men," the report continues, "have all been trained to a greater or lesser extent in the principles of discipline, loyalty and good citizenship. We are proud of what the scout movement in Canada has accomplished."

A High Commissioner to Canada

A Necessary Sequel to the Report of Imperial Conference

The appointment of a British High Commissioner in Canada is a necessary sequel to the report of the Imperial Conference. That document, it will be recalled, insisted on the Governor-General's position as a personal representative of the sovereign and not in any sense a political agent of the Home Government. This carries with it the detail that provides a soft blousing effect at the hip-line. The skirt is in four gores, satisfied by two box-plaits in the front. The blouse, No. 1347, is in sizes 16, 18, 20, 42 and 44 bust. The skirt, Size 36 requires 2¾ yards 36-inch figured material, with 2¼ yards plain. The suit, No. 1341, is joined to a body lining, and is in sizes 34, 36, 38, 40, 42 and 44 inch bust. Size 36 requires 1¾ yards 54-inch material; body lining 1 yard; 7 yards 39 inch contrasting.

Oats As An Annual Hay Crop

Produce Higher Yields Than Most Other Annual Crops

Three different experiments are under way at the Scott Experimental station to determine the value of oats as an annual hay crop, which include seeding at different dates, but stage to cut oats for hay and a comparison of oats with other annual hay crops.

In the date of seeding experiment the first seeding is made about May 24 and continued for five successive seedings at ten-day intervals. So far results indicate that the first two seedings in June have given the best returns, while any seedings made after June 26 are generally forced shortly after the bloom stage, thus reducing the quality of the feed.

Nine varieties of oats are used in the test dealing with the best stage of development to cut oats for hay. These varieties consist of early maturing, medium and late maturing sorts. Each variety is cut at three different stages—Bloom, late milk to early dough and ripe stage. Results so far show that the early maturing varieties over the earlier ones for hay production. This holds true in a three-year average for each of the different stages. The test further shows that the second stage, late milk to early dough, gives the greatest tonnage per acre as well as the highest dry matter yield per acre.

In the experiment comparing the different kinds of annual hay crops seven different crops were tested. Oats have outyielded all other crops tested with the exception of corn. When the cost of seed, and the difficulty of harvesting and curing in bad weather are considered it is doubtful whether peas can safely be recommended unless greater differences in yields are obtained.

Aside from the fact that oats produce higher yields than most other annual crops, it has many other advantages—feed is cheap and easy to secure. No special machinery is needed to seed it. The crop is hardy and may be safely seeded any time from early spring to about the middle of June. When the crop is seeded on summerfallow or other cleaned land there is little or no danger from weeds and one of the most dependable annual crops and comparatively good yields may be expected. Scott results indicate that oats cut in late milk to early dough give the best returns. However, they may be used in all stages from the first cut oats that have scarcely reached the bloom stage to ripe sheaves. When a farmer has several acres of oats that have been a particularly big increase in the call for forage crop seeds, while not to be cut with an ordinary binder makes this crop easy to handle both in the field and when fed to stock.—Experimental Farm Note.

Registered Seed Grains

Saskatchewan Seed Pool Reports Doing a Big Business

The business of the Saskatchewan Seed Pool is reported more than double that of last year. There has been a particularly big increase in the call for forage crop seeds, while not to be cut with an ordinary binder makes this crop easy to handle both in the field and when fed to stock.—Experimental Farm Note.

Will Deliver Official Welcome

Premier W. L. Mackenzie King will deliver the official welcome on the behalf of the Dominion of Canada to the delegates to the World's Poultry Congress on the opening date, July 27.

About some people the worst thing you can say is the truth.

German Firm Insures Against Bad Weather

Quite in Keeping With Progressive Spirit of Age

For many years we have been used to hearing of odd guarantees undertaken at Lloyd's in the form of insurance against all sorts of risks to almost every conceivable manner and under the most weird conditions. It has remained for the German Insurance companies to undertake a novel weather policy. The advantages of this ought to be obvious to the most obtuse mind. For instance, suppose you have arranged to take your holidays in the first half of August, and, instead of sunny skies and balmy air, you have leverlue clouds and continuous rainfall. What a comfort it would be to notify your insurance company and quietly await the arrival of their cheque "in full settlement of claim on account of inclement weather."

According to this German system, you can take out a policy for any number of days in the whole year, so there is no difficulty about safeguarding yourself. How the matter will work out if each policy holder insures themselves against fair losses through weather risks it is not so easy to determine, but doubtless methods will be found to protect the insurance companies from any misinterpretation. The principle of insurance against weather reverses seems a sound one, quite in keeping with the progressive spirit of the age.

De Luxe Airplanes On London-Paris Route

Machines Are Capable of Carrying Twenty Passengers Each

Airplanes with buffets, bars and other luxuries have been built on the London-Paris service by the Imperial Airways. Planes will leave each city at noon daily and will soon also be known as the Silver Wing Service. As there are no regulations for licensing airplane restaurants or bars the company will be free to sell food and drink aerially without a license. Each plane will carry a steward.

Three-engined Argosy machines capable of carrying twenty passengers each, will be used in the new service.

The company has decided henceforth to name all planes after cities. For some time planes were named City of New York and the City of Washington have been flying between capitals.

Advice for Airmen

Remarkable Instructions Issued by British Air Ministry to Pilots in Training

"Chew gum and clock your ears!" These are two remarkable pieces of advice contained in the latest instruction manual issued by the British Air Ministry to pilots in training. It appears that flying at high altitudes causes a different pressure on the outer and inner ear drums, and constant swallowing is necessary in order to equalize it. Chewing gum helps to keep the muscles in a good head active in this way. Pain, temporary deafness, and other ailments among the unusual pressure may also be cured by "clicking" the ears. This strange fest is performed by pinching the nostrils and breathing out-wards.

The old-fashioned man who used to put his fourteen-year-old son on the train for a twenty-mile journey and tell the conductor to take care of him now has a grandson of fifty-some age who can drive the distance in twenty-three minutes.

"That, my boy!" said the forcer of coins to his son as they passed the Mint. "Is our principal competitor."

Western Inland Fisheries Have Been Developed More Highly Than In Any Part of the World

Alberta Forage Crop Cars

Forage Crop and Poultry Cars Convey Information to Farmers

The forage crop and poultry cars which were operated in Alberta by the Canadian National Railways in conjunction with the Alberta department of agriculture have concluded their itinerary. Twenty places were visited and the movement was confined to districts in which the Western wheatstem sawfly is now raging or in which the fertility of the soil, due to continuous grain growing, is rapidly becoming depleted. Where soil impoverishment is found, the inclusion of forage crops in the rotation will add fibre and humus, increase the soil content of available plant food, and as sweet clover and other broad leaved forage crops are immune from attacks of the wheatstem sawfly, the growing of such crops will play an active part in controlling and eliminating this pest.

The total attendance was 1656 or an average of 82.8 persons per meeting. Forage crop seeds amounting to 6,559 lbs., value at $954.10 were sold, comprised of corn, 426 lbs., grasses, 2,819 lbs., sweet clover, 1,814 lbs., and alfalfa 400 lbs. At each point lectures on the value of forage crops in the farm rotation and their place in the farm economy of the west were delivered by James Murray of the Alberta department of agriculture. Short work talks and answers questions on cultural methods were asked.

A lecturer on poultry gave talks on the fundamental principles necessary for the successful care and management of the farm flock. Much interest was shown by farmers in this phase of farming, which indicates they are rapidly becoming appreciative of the value of including side lines in their farming activities. Many farmers took the opportunity of purchasing pedigreed males to better or secure supplies of hatching eggs and day old chicks.

Raw Fur Production

Total Market Value of Pelts Taken by Trappers Reaches High Figure

To the value of $1,500,000, the Canadian Fur Auction Sales, Limited, sold a wide variety of furs at the recent five days' session at Montreal. "One of the best sales weeks we have ever staged," said Major F. H. Pingree, general manager. Silver fox skins to the number of 2,600 were auctioned, the top price being $415.

The total value of the raw fur production of Canada, for the season 1925-6 was $19,965,858, compared with $15,441,564 for that of 1924-5, and $15,643,817 in 1923-4. These figures do not represent the total market value of the pelts of fur-bearing animals taken in Canada by trappers or on fur farms, in the spider of allowance, muskrat causes first with 1,853,545 pelts at $3,014,175, followed by beaver with 311,707 pelts valued at $2,965,856. Next in order come red fox, white fox and silver fox.

"Carat" as Applied to Gold

Refers to Purity or Quality and Not Actual Weight

"Carat" is a comparison of a word that used to stand for a particular sort of thy used. As these seeds were called by the same name as they became a recognized standard of weight for such small articles as gold and precious stones. In the early weighing of gold, 24 of these carats went to one special coin, now long obsolete.

Nowadays the term carat has nothing to do with the actual weight of gold, but refers to its purity or quality only. Its real gold is no doubt a common use, and has therefore generally to be mixed with some other metal, and when we speak of "22 carat" and we mean that out of 24 parts of it 22 are really gold. As a matter of fact, even this alloy of 9 parts in 24 or 37½ per cent of the metal is barely sufficient, and except for wedding rings, 22-carat is seldom used, 18, 15 or even 9-carat being far more common.

Radio Aids Eskimo On Isolated Island

Government Surgeon at Nome Prescribes For Sick Man

Radio apparatus was used in an effort to save the life of a wealthy Eskimo, ill on St. Lawrence Island, in Bering Sea. The ice-bound island cannot be reached until July, except by airplane. When an Arctic storm prevented an aviator from flying to the island to take the Eskimo to Nome, Alaska, symptoms of the man's illness were described in a radio message, and the Government surgeon at Nome, radioed back directions for treatment.

Statistics show that nearly all motor accidents occur at week-ends. Monday was once wash-day. Now it is the day when mother sees wheels or all her family have survived the week-end.

Just how old is a man when he is old enough to know better?

First Refugee from Chinese War

Mrs. Melvin Southwick, of Harriston, N.Y., returned to New York, April 12th, aboard the world-cruising Canadian Pacific flagship Empress of Scotland, with her latest daughter (their 13 weeks old), who was born in Hankow, China, a few days before the inhabitants were ordered to evacuate. She went to Shanghai and thence to Kobe, Japan, where she embarked on the Empress of Scotland. Her husband is still in Hankow, acting as representative of the Standard Oil Company there. She was met by her mother, Mrs. Freda Becker, when the Empress docked. Mrs. Southwick looks none the worse for her adventure, but that may be due to the kindness of the passengers on the C.P.R. vessel's world trip, who couldn't do too much for her and for whom her dramatic escape and presence on the ship added a final thrill to the many they have experienced on their globe-circling journey. As for Miss Southwick, she wasn't interested either in the Chinese or in her numerous adventures.

Alfalfa Seed For Denmark

Two Carloads of Seed From Alberta Shipped to Danmark Growers

The sale of Grimm's alfalfa seed, grown on the Brooks district, and shipped to Denmark for planting as another "feather" in Alberta's cap. For some time past, experiments have been carried on in Denmark with this particular seed. So successful have these been, that the Danish growers purchased two carloads. The Danish growers would have taken twice that amount had it been available, but, owing to United States growers placing large orders, the local seedmen have not been able to keep up with the demand. Growers of Grimm alfalfa seed have been paid $40 an acre clear for their product.

"Why is it that you have broken off your engagement, Alice?" asked her fair friend. "Oh, my dear," he told me he was connected with the movies, and the very next day I saw him driving a furniture van."

It takes more than nine men to make a fashionable tailor.

Relieve That Lazy, Worn Out, Half Dead Look

Don't Wait Another Minute

You can do wonders with your appearance. Bright eyes, cheery smile, clear complexion, snappy steps, all indicate vigorous men and women.

Your trouble may be Constipation—poisons from waste matter in the intestines circulate in the blood through your system.

Sick Headache, Biliousness, Indigestion, Drowsiness, Poor Appetite and sallow complexion generally follow.

CARTER'S LITTLE LIVER PILLS is a vegetable laxative, moves the bowels gently, no pain, and do not contain Calomel, Mercury or habit forming drugs.

CARTER'S LITTLE LIVER PILLS are small, easy to swallow and if taken daily as a regulator will prevent these ills.

Try them to-night—to-morrow refreshed. 25c. and 75c. red pkgs.

WORLD HAPPENINGS BRIEFLY TOLD

Col. W. A. Bishop, Canadian V.C., has successfully promoted a chain of groceries in England.

The Toronto Hydro Electric Commission has provided tear gas guns as a protection for its cashiers against hold-up men.

In operation since before Confederation, the Welland Railway, one of the oldest steam roads in Ontario, has ceased to carry passengers, mail and express.

A gift of $900,000 by John D. Rockefeller, Jr., was included in total contributions of $1,725,000 has been announced in the New York Y.M.C.A. building campaign.

On the ground that aeroplanes endanger summer visitors, cottagers residents of the Thousand Islands have begun a movement to have 'planes for hire prohibited.

With Queen Wilhelmina presiding, Princess Juliana, who attained her majority April 30, was ceremoniously inducted into privy council, by which she is entitled to membership by virtue of reaching the age of 18.

The ballast fishing boat Dolphin caught, last at Prince Rupert, B.C., while taking on a supply of oil. Before the flames could be extinguished the boat blew up and sank. A fisherman was seriously burned.

Inception of a systematic campaign by Chinese to undermine the loyalty of British, American and other foreign sailors at Hankow was reported to the navy department, Washington.

A German effort for a reduction in the Rhineland occupation is imminent, the Boerzen Zeitung asserts. The document is expected to call attention to the formal promise it received on this question, emphasizing that a solution cannot be postponed.

At a meeting of the Board of Winter Fair executive in Toronto, it was decided that all animals exhibited at the fair in future should pass the Dominion Government tuberculin test before being shown. The executive's action was later approved at a meeting of the directors.

Bones of six hundred Chinese buried in Mountain View Cemetery, Vancouver, for more than seven years will be exhumed and shipped to China for burial. Permission to exhume the bodies has been granted by Dr. H. M. Young, provincial health officer.

Indians Want Franchise Extended

Emerson K. Snake, an outstanding Mohawk Indian, and grand president of the Grand Indian Circle of Ontario, announces that application will be made at the next session of the Parliament of Canada for an extension of the franchise to Indians throughout the Dominion. At the present time only those who served overseas during the world war are eligible to vote at either provincial or federal elections.

1,000 Registered Beekeepers

Saskatchewan has now over one thousand registered beekeepers and the number is steadily increasing. Production of honey is becoming one of the staple industries of the province.

1927 Wife: "You have been using my comb, it's full of long hairs."

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney troubles by gently toning and healing the inflamed tissues. 50c a box at all druggists.

W. N. U. 1660

Motor Drivers in Britain

One in Twenty of Inhabitants is a Motorist

How many people are there in Great Britain who actually drive motor vehicles.

The figures issued by the ministry of transport showing that 2,190,946 licences were issued last year in respect of cars, commercial vehicles and the motor cycles do not, says the Daily Mail, give an indication of the number of people who actually drive, nor of the number of vehicles in existence, as a large proportion of the licenses were for quarterly periods.

But there is another return which gives $2,849,550 as the amount received for driving licenses. In this case is included a very small amount received in respect of unpaid car licenses. Driving licenses cost $1.25, on that there were more than 2,200,000 actual drivers of motor vehicles in 1926. In some cases a private car is driven by several members of the family.

Taking the population of Great Britain as about 44,000,000, one person in every 20 is therefore a motorist. They have a long way to catch up with the United States, however, where approximately one person in every six owns a motor car.

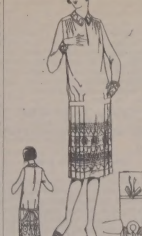
Germans Serving In French Foreign Legion

Report Shows Annual Enlistment is About Fifteen Thousand

Between 25,000 and 40,000 Germans are now serving in the French Foreign Legion, according to recent figures. It is also asserted that the German army recruits during each French colors annually is nearly 15,000.

Inquiry at the German Foreign Office elicited the information that these figures are about correct, though somewhat high. It was stated that unemployment in the principal reason for the enlistment of many young men who, tired of waiting for work, accept the easy goles, willingly don the Legionnaire uniform.

The Reich Government frequently protests against activities of French recruiting agents in occupied territory, and the Foreign Office receives frequent complaints of men being serving in Algiers and the French colonies. It is rarely able to do anything, however, as the French insist that the recruits entered the service voluntarily and signed a five years' working contract.



Plaits Assume Importance

The latest reflections concerning the approved silhouette, adult plaits to a degree of importance in forming about the desired full skirt. In this group of girlish dresses the plaits are placed either side of the front, extending from the belt to lower edge, and provide the desired flare. The plaits back is in one piece, the fullness over the shoulders is your effect. There are a group of small plaits at each shoulder, and the plain sleeves are finished with narrow cuffs. The diagram pictures the dress as developed in No. 1285, which is in sizes 16, 18 and 20 years (or 34, 36 and 38 inches bust only). Size 16 requires 3¾ yards 36-inch material with ¾ yards 36-inch contrasting.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should learn to make her own clothes, and the home dressmaker will find the Fashion Department in our new Fashion Book to be practical and simple, yet outstanding the spirit of the mode of the moment. Price of the book 10 cents the copy.

SEEKS LARGE LAND TRACT

T.c. Emil Lengyel, personal representative of Count Karolyi former premier of Hungary, visited Western Canada in April to look for a suitable agricultural area upon which the Count with a large body of retainers from his estate in Hungary, is anxious to settle. Dr. Lengyel, who is a distinguished author, made a trip through the Lindsay and Kirkoki districts of Saskatchewan and the Minitonas districts of Manitoba in company with W. E. Walters, travelling land settlement representative of the Canadian National Railways, and was much impressed with what he saw. The photograph, taken upon Dr. Lengyel's return to Winnipeg shows, reading to right F. J. Freer, superintendent of Land Settlement, Canadian National Railways; Dr. Emil Lengyel and W. E. Walters.

Hungarian Chemist Makes New Discovery

Has Process for Making Paper Pulp From Cornstalks.

Dr. Bela Dorner, a Hungarian chemist, is said to have uncovered a process by which cornstalks can be utilized in making a high grade paper pulp, the manufacturing cost of which would be lower than for the same quality of pulp made from wood or cotton. At present it requires from one and one-half to two tons of wood to produce one ton of chemical pulp, while by the Dorner process about three tons of cornstalks are needed.

For a number of years experiments have been conducted to turn cornstalks into paper, but many technical difficulties stood in the way of overcoming those working upon the problem. The elimination of the pith and knuckles of the stalk has been one such problem, but through the new method this is all finely ground with the rest of the stock and becomes part of the final product. Another problem was to overcome the prohibitive cost of manufacture under the various processes. Both of these, it is declared, have been eliminated, and those holding Dr. Dorner patents intend to start production on a large scale, beginning with a mill of 50 tons daily capacity.

Several paper manufacturers who have investigated the Dorner process say that the opinion is held that a wonderful possibilities for the utilization of a product considered largely a waste. The world scarcity of the industry upon any fair sleep scale would give the corn growers of the country an opportunity to turn an almost useless farm product into real money and at the same time relieve the present drain upon our pulp wood forests.

The world scarcity of the industry upon any fair sleep scale would give the corn growers of the country an opportunity to turn an almost useless farm product into real money and at the same time relieve the present drain upon our pulp wood forests.

How Should I Wean My Baby?

This is a serious problem to many mothers. Weaning should always be done gradually, beginning about the seventh month, giving one or two bottle feedings during the day, increasing the number of bottle feedings monthly until weaning is accomplished. Borden's Eagle Brand Milk is so like mother's milk in taste and ease of digestion that it can be given alternately with breast milk without causing abrupt weaning.

In this connection due to clue you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare and Baby Record Book. Or, just write the Company, mentioning this paper, and they will be sent.

Building Up Police Force

The policemen of Bradford, England, are not tough enough the city council has decided and rules have been issued with a view to making the guardians of the law real be men. In the future they must take a cold bath every morning, along with the bedroom windows open, go through daily dozen exercises and brush their hair with a brush. The council hopes to build up the force.

Requisites on the Farm.

Every farmer and stockraiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but also for horses and cattle which are victims of great lameness. As a subscribe for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

For Canadian Industries.

It is announced by Premier Ferguson that the Ontario Government purposes to foster the creation of an industrial research institution with an endowment of $2,000,000 for the purpose of solving scientific problems of production and process for Canadian industries.

"Doctor, what would you advise a man to take when he's run down?" "The same as the rest. If he's in a condition to."

Surveying Sites for Airship Terminal

Sir Samuel Hoare Says Mast Will Cost $350,000

The airship mooring mast to be erected in Canada will rest in the neighborhood of £70,000, according to the estimate made by Sir Samuel Hoare, secretary of State for Air, at the last Imperial conference.

The arrival in Ottawa of Major G. H. Scott, of the Royal Air Force, to survey the mooring mast for the mast has aroused considerable interest in the whole project. At the Imperial conference it was announced by Sir Samuel that "there was no technical reason why the journey to Canada should not be reduced to two and a half days" by the use of airships. At that time he strongly urged the governments of the dominions to keep landing grounds in proper condition.

The British Government will have completed in the fall of this year two airships capable of carrying freight and 100 passengers for 4,000 miles without refueling. The ships will have a gas bag six million cubic feet in capacity. The passenger accommodation will be in "cabins, saple smoking and dining rooms." Speaking of the question of danger he said, "We believe we have discovered many of the weaknesses and surmounted many of the difficulties that occasioned failures in the past."

The projected mooring mast is of structural steel, with a revolving turret at the top to permit the ships moored ship to veer with the wind. A supplemental meteorological service will be set up with the mast. Major Scott, who piloted the R-34 across the Atlantic in the summer of 1919, is in Canada in a purely advisory capacity.

He was accompanied by A. R. Gibbs, civil engineer.

A Memorial Window

To Be Erected in Winnipeg in Remembrance of Major-General L. I. Lipsett

A memorial window for Major-General L. I. Lipsett, of Montreal, officer, who commanded the 8th battalion C.E.F. during the war, is to be placed in St. Alban's Church, Winnipeg. An inscription stating that it is erected to the memory of General Lipsett by the 8th Can. Battalion, 2nd Can. Infantry Brigade, and the 8th Battalion C.E.F., will be placed underneath. War veterans throughout Canada are invited to say what to subscribe to this memorial fund, may send any amount, no matter how small, as it is wished to make the subscriptions as representative as possible. Remittances may be sent to F. T. Paris, assistant general-manager Dominion Bank, Main and McDermot Streets, Winnipeg. Subscriptions to be sent not later than June 1st, 1927.

Will Benefit Mariners

New Device Will Help to Minimize Dangers of the Deep

That mariners known, of such a thing as "steady nerves" in the days of "1912, the Titanic might now be plying her majestic course on the way to Cherbourg and 1,500 lives might have been saved.

Dr. A. G. Huntsman, of the biological board of Canada, speaking before the oceanographic section of the American Geophysical union, said the "water report" is based on tests of temperature and salinity. In the case of the Titanic, he said, it would have warned of the proximity of ice bergs. It will benefit fishermen, one in locating schools of fish and will aid meteorologists in making weather forecasts.

Never feel with a fool, he might fool you.

Improving Canada's Highways

Good Roads Are Highly Important to Country's Advancement.

There are few who will begrudge the $65,565,000 spent in Canada last year by the provincial governments on the construction and maintenance of highways. Governments spend little money to better advantage, and every mile of improved roadway is a national asset. Over the 46,531 miles now included in the provincial systems, and the heavy mileage in the municipal and township systems, the people move about in a constant and ever-increasing stream, getting acquainted with one another and with their own country. This is a result that is highly desirable, because the more one knows of Canada the greater is one's love for Canada, and there are many other respects in which the growing system of good roads is of incalculable importance. Millions of money are being contributed to put thousands of farmers into close communicating with their city neighbors and city markets, and rural isolation is becoming a thing of the past in large areas. Tourist traffic is almost entirely dependent on the condition of the roads, and we are just beginning to realize the huge cash value which this traffic may have for us if it is encouraged intelligently.

The joining up of the various links to create a national highway from coast to coast is an objective to which all Canadians look forward. It would rank with the construction of the first transcontinental railway as a unifying factor in Confederation and would have an enormous influence upon the whole country. Probably it will come only when the Federal Government takes a hand in the project, because there are few provinces that are sufficiently settled—notably along the north shore of Lake Superior—in which the main highways are confined to provincial governments to make leaps and bounds in roads, but serially some day Canadians will travel from the Atlantic to the Pacific without being obliged to cross the border.

Alberta's Progress

Has Developed Population by 225 Per Cent. in 21 Years

The Province of Alberta has attained one of age in 1926, according to a preliminary statement of the census figures published on Tuesday by the Department of Trade and Commerce. The census of 1926, 1921, and of 111,142 since that of 1916. The population of Alberta in 1926, one year after the province was formed, was 185,195. In its twenty-one years of life it has added 422,253 citizens, or developed its population by 228 per cent.

The rural population is shown as 374,614 and the urban at 232,976. The country dwellers constituting over 61 per cent of the total. Since 1921 rural population has increased by 9,061 and urban by 10,966. In twenty years country dwellers have increased by 150,561 or 67 per cent. and city and town dwellers by 175,552 or 306 per cent.

Italian Arrested For Selling White Bread

Law Imposed by Mussolini Forbids Any Efficiency Loaf

Snooping fanciers, in Naples, followed a bearer. Sniffing, they inhaled the aroma of fresh bread. Soon the bearer was apprehended. He was found to contain white loaves. Weighing, baptizing, the wretched culprit was dragged away to the lock-up and broken the law forbidding the baking, transport, or sale within Italy of white bread, known as the "economy loaf" imposed by Signor Mussolini—a loaf either of whole wheat flour, or of white flour mixed with a coarser grain. Soon the whole clan-baker and with him a list of rich Neapolitans who have been buying his white bread, will be haled before a folk tribunal, feared arrest or fascist reprisals for their iniquity.

Freak Played By Storm

Wind Took Roof Off and Then Re turned It

Within a minute, a miniature tornado devasted the Devon village of Kilburton, near Plymouth, England. Roofs were blown off or damaged, and the houses, large trees were uprooted, and a half-ton chimneystack was blown into a field nearby. The roof of a bed was buried beneath masonry, but not hurt. Most remarkable was a freak of the gale at Ipplepen. The wind lifted a roof in the village, whirled a curtain into the space between walls and roof, and then let the roof down again.

Alberta Pool Elevators

The Alberta Wheat Pool has been ed No. 2 elevator at Vancouver $100,000. This Pool will have ten elevators in Alberta by the end of harvest, and will be ready for business in all of them.

Bill—"You said I haven't the brains of a flea."

Mac—"No I didn't, I said you have."

Freelancers now leasing an apartment in France are taxed according to the rent paid.

When it comes to stepping into a footsome no man objects to putting his foot into it.

"Talk about water off a duck's back!—Just look at our shoes, even after fifteen minutes in this downpour! There's certainly nothing quite like 'Nugget'!"

"NUGGET" SHOE POLISH

There's a "Nugget" shade for every shoe made.

APARTMENT BLOCK FOR SALE

ATTRACTIVE INVESTMENT PROPOSITION

The undersigned has for sale a most attractive, well rented, centrally located Apartment Block in Winnipeg, yielding a handsome return to the man or investor who could give the property his personal care and supervision. One with ordinary ability in handling rents and tenants, and capable of doing his own repairs, would undoubtedly find that the purchase of this new apartment suite at a free rental, and the maximum profits out of the proposition we have to submit. $10,000 to $15,000 needed to handle the deal.

SUNDAY SCHOOL LESSON

MAY 15

PETER AT PENTECOST

Golden Text: "Repent ye, and be baptized every one of you in the name of Jesus Christ unto the remission of your sins; and ye shall receive the gift of the Holy Spirit." Acts 2:38.

Lesson: Acts 2.

Devotional Reading: Philippians 2:5-11.

Explanations and Comments

1. The Coming of the Holy Spirit at Pentecost, verses 1-4.—Before He left His disciples Jesus gave them a great commission. They were to continue where that He in the 500 and that he lived and taught and only they could fully testify, that he was truly suffered, died on the cross for the salvation of the world, and that he had arisen from the dead and ascended into heaven. "Jesus Christ and the power of His resurrection" was a truth which the world would not readily accept. Only the power of the Holy Spirit in the high could these men accomplish their great task.

On the Day of Pentecost that power came. There was a sound as of a rushing and appearance as of fire, symbols of the Holy Spirit. The Jewish feast of Pentecost prophesied God in words that sounded strange to them. The Holy Spirit was the One that then realized that the Spirit of God had come into their hearts, that He was to abide with them as their Strengthener and Helper, to lead them into all truth, the work of making the Christ known to the people of the earth.

The Holy Spirit is just God making Himself intelligible to men, God speaking to each of us in His own tongue.—John Kelman.

Contend Aerials On Schools Are Dangerous

Paris Authorities Instruct Directors to Have Them Removed

On the grounds that wireless aerials might during a sudden storm crash down to the ground and injure passersby, the directors of Paris public schools have been requested to take down the aerials erected over their buildings.

The Paris municipal authorities justified their decision by arguing that the wireless sets installed in the classes used as public schools are not used by the directors for the purpose of teaching their pupils, but solely for their own personal amusement.

One Paris newspaper remarks that chimney stacks might be considered to be as dangerous as wireless aerials and therefore ought to be abolished forthwith.

Girls Working on Airship

Biggest Machine is Being Built for British Government

Three hundred persons including 140 girls, are working on the new airship building for the British Government which will, it is asserted, be the largest in the world when complete with a length of 700 feet and displace 750 tons.

Its capacity will be more than 4,000,000 cubic feet and its maximum speed 70 miles per hour. There will be accommodations for 125 passengers.

Workers are conveyed to and from the airdrome by motorbus from surrounding districts. The experts are housed on the site of the drome and their meals are allowed anywhere near the grounds.

Future of Vancouver Port

Roger Babson noted statistician in addressing the Canadian Club at Toronto said that in the future Vancouver would be the greatest port on the American Pacific coast, and that it was only a matter of time when the trade across the Pacific ocean would equal, if not exceed, that of the Atlantic.

Historic House Destroyed

The cottage at Shallow Ford, near Stafford, the home for 52 years ago of Isaak Walton, author and fisherman, whose fame has come down over the years as the author of "The Compleat Angler," was destroyed by fire recently.

Mrs. Brown—"There's your father!"

Bright Son—"Oh, he's out taking a little ride in the mortgage."

Success Came Too Late

Orchid Expert Died Just Before His Perfect Flower Bloomed

A tragedy lies behind the world's most perfect orchid, which was on show at the Horticultural Hall.

Thousands of people who read about it and went to the show specially to see it, were unaware that the man to whom the flower was most precious never saw it—for he died a month before it bloomed.

Messrs. J. Charlesworth & Co had been working for 15 years to produce the perfect odontoglossum, and three years ago the flower bloomed for the first time. It was not perfect then, but it received a certificate, and H. T. Pitt, of Stamford Hill, an orchid expert, saw it and believed that in time it would bring the long-sought perfection.

He bought the plant for some hundreds of dollars, leaving it with Messrs. Charlesworth's for cultivation.

It bloomed the next two years, raising in beauty, and Mr. Pitt knew that it would be shown this April. He was eagerly looking forward to the time, but as mentioned, he died before it bloomed.

Canadian Tobacco Abroad

Canada Sending Large Shipments to Great Britain

Canada is sending increasing supplies of tobacco to the United Kingdom, according to the Trade Commissioner at Bristol. One organization has built a factory in Ontario, have their own leaves, and are packing the leaf, Canadian Burley, to suit the English trade. Consumers in England are evidently fond of Canadian tobacco and with the Empire preferential duty, which amounts to 30 cents per pound less than the duty on foreign tobacco, increased quantities of Canadian Burley will find their way to the United Kingdom.

Many a man would be troubled with chronic insomnia if he knew what other people know about him.

CHAPTER XXXV

The Fete

Trippets and mannequins, puppets of conventional evening dress that uniforms eager and blase men strike, and the mannequins of their dream world in the gorgeous splendidence that levels the cheap and the superb; Pierrots and Columbines, eyes shining with the thrill of pain that crosses every threshold with merry speculation; in endless stream they drove from every nook of Hidden to the gates of Villa Amelie.

Beyond the gates the gardens and terraces, miniature lakes and fairlike shrubbery in delightful disorder, were bathed in a dull silver flood of artificial moonlight, the illusion was marvellous, the trees and shrubs were rippled by slowly lit illumined fountains that spouted thin perfumes.

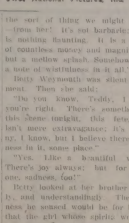
Hidden somewhere in a bower of orange trees an orchestra played its lamentations and its caresses of outcast night music. Tall palms, feathers topped, black and fantastic, made bowers among benches and in nice, great crevices of the lawns had been carpeted with crash-like scenes purple lilacs, rhododendrons, hyacinths and oleanders. Now and then, from branches of ivy, myrtle, or fig or pine trees, some fabricated bird or semi-tropic plumage, too opulent to be real, darted down upon the scene with gem-bright indolative eyes.

During the day the gates had been raised to all comers. Only the workmen, caterers, electricians and the preparing, queer-mannered men with vended visions of dancers and mysterious conjurer performers, had been allowed to enter the grounds. There had been public announcements, posters in shrubs through the barrier so busily guarded by watchmen, but none had been successful. Even the telephone except that line which reached the offices of the servants, had been shut off. So it was that even the natives of Villa Amelie, those who had watched the preparations from day to day, were utterly amazed at the splendor of the invitations, the consummate artistry of the spectacle into which they strolled.

Teddy Dorcaline, who had been one of those who sat during the day had been futile, stood amazed when, with his sister, Betty Weymouth, at his side, he turned about on the highest terrace to look over the sloping lawns. Betty exclaimed:

"Great, how appropriate when for a Lord Teddy summoned. But Jean!"

"During, brilliant, extravagant Lord Teddy summoned. But Jean



John took her zealously in his arms. She did not resist but yielded to him limply.

Kenilworth, who frankly admitted that he was pleased to be relieved of the futile to hear from him during the day, treated the homilies by Lord Teddy and Betty whimsically. "Where can we head her?" he said. He said. "And what's true isn't interesting. Just a candle open held up, with a beautiful fluky about it. The Monaco police notified me today that all valuables taken by the bas who had been so cleverly delivered to them in a package with the terse suggestion that they be returned to their owners."

"But Jeanne!" Betty Weymouth asked. "You should never have taken her up La Turbie, Reddy. There are ugly little shacks."

Kenilworth ignored the probing. "It is ten o'clock already," he observed, "and nobody else my young has appeared. Both of them have an admirable sense of the dramatic."

Fountain in scarlet and gold moved among the guests, bearing trays on which cobwebby glasses and silver decanters clinked. Wines of brilliant and the more sonorous fluids of liqueurs and whisky. A young demitaste from America, one of those whom Jeanne used to copy but who, however, could be read in the papers till upon ways of copying her, exclaimed to her companion:

"It's like a scene in a supernatural novel, isn't it? A movie party is always so coarse and cheap. How everything is on such a scale of opposition that is romantic! There is so much wine and champagne about, but no one is silly."

An English countess smiled away on the arm of a bowed dance floor with a partner borrowed for the moment from a celebrated beauty from the shores of the Indian Borders. An Indian Prince, scornful of the rules of his caste, wrapped a spell into his soothes which owed about a gentle girl in satin and pearls. A Deputy of France discussed his wife with a Monte Carlo manicure in whose arms he had captured the secrets of many other wives.

Into this enchanted garden the Golden Girl walked at last, with Yvonne beside her. In an hit or less than the eye could discern was there a memory of the night before; of the bitter, dismaltous tour in the little room at the club house on the Turbie; of the desperate drive down the mountain, or of the scene at the fireplace with Yvonne and John as the actors. The poise of her was regal, arrogant. The crowd that watched the turn of her head, the shimmer of her gold brown hair, the dazzle of a thousand diamonds in her deep brown eyes, saw only the noble and wanderlustous of her golden gown and her self indulgence. It seemed to every one in that crowd that when Joanna had looked upon them, had accepted their homage and expressions of wonder, she gave her brown crowned head a merry toss and then plunged into the sparkling current, her golden wand had conjured.

Kenilworth managed to reach her, but only her hands and lightly into a cascade of questions about the outcome of the night after the sun did took her away, but she laughed at his questions blind and said: "It's yesterday tonight, Reddy," she has teased. "To-divine now just for the hour. Tomorrow you'll discover for everyone who scorns me; everyone who loves me is here tonight—who knows? Ask me tomorrow, Reddy, anyone a waltz, I think. Reddy. You may hold me close. I want everyone to hold me close, tonight! But don't ask me anything except to accept of me just as I am tonight. Come!"

She led him to the nearest dance space. At every vision of her, wherever she went, orchestras began to play their melodies, stopped the band that had essayed a fox trot and ordered a waltz, and danced it silently with Kenilworth. When the music died she hurried to another, waving her hand as she swept away.

(To Be Continued.)

Protecting the Forests

Canadian Forest Week the First Shot Fired in Campaign

The setting aside of the last week in April as a Canadian Forest Week was a splendid and striking educational measure. To those interested in forestry work, it is, however, but the beginning of what is hoped will from the other four 300-odd members of this pon. at $5 to $10 per cap.

The forest is second only to agriculture, in production of commodity value, and it is rightly the mainstay of Canada's total export trade.

Thoroughness of the land area of the lumbering industry, of the agricultural production, and of this fully one-half can be made to produce timber crops of the commercially desirable protected and managed for that purpose.

Owing to inadequate protection and extravagant use, Canada's supply of softwoods is now only two fifths that of one strongest competitor, United States, despite our large forest area.

The relation to the present and potential value of our forests as basic industries, the amount spent for forest protection is entirely inadequate and out of proportion to the importance of the industry.

The forest has been so ravaged by fire that the growth rate is seriously reduced. Only a small part of annual growth will not meet annual use, and all losses through fire, insects, and decay cannot further net depletion of forest capital.

Ingredients of Bread

The ingredients of cold countries make the darkest bread, of the tropics the whitest. Cornstarke are used as an ingredient in bread in Mexico and Spain, rye flour, dried fish is used in Iceland, potatoes in Ireland, chestnuts in Italy, and during bad years the bark of trees in Russia.

"Ah! You are the young man in question? What's your name?"

"Austen-Insupercognito-t."

"How do you spell it?"

"As it is pronounced!"

ECZEMA IN SMALL PIMPLES

On Hands and Face, Itched and Burned. Cuticura Heals In Six Weeks.

"Eczema broke out in small pimples on my hands and face. The pimples were hard and red, and itched and burned. I could not wash my hands in water because it made them worse. I could not help scratching and rubbing the affected parts and causing disfigurement. The trouble lasted five months.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and in about six weeks I was entirely healed." (Signed) John A. MacDonald, South West Margaree, N. S.

Nothing quicker or safer than Cuticura Soap and Ointment for skin troubles that itch and burn.

Sample Each Free by Mail. Address: "Cuticura, Dept. X, Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Cuticura Shaving Stick 25c.

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Minesing, Ontario. — "I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was confined to bed and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed. I would be so weak. I have been in the power of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was like a new woman and have had splendid health ever since. When I feel my hearing down pains I always take it; sometimes a half bottle or whatever I need. It is my best friend and I have told many to see about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it." — Mrs. NEAL BOWEN, R.R. 1, Minesing, Ontario.

Do you feel broken-down, tired and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and it takes right hold and persistently will relieve this condition. C

W. N. U. 1630

Gaily colored fronts—this Spring. Splendid things to carry about to match. Tints born in sunlight, warm but with true dyes. Dipping will do the rest—nothing could wash out. And it must have real dye to get a smooth, perfectly even tint.

Diamond dye powder is fifteen cents at any druggists; so why do half a job with something not half so effective? And when you want the thrill of accomplishment, dye that bathing waiter instead of coat.

The Direction Book tells quick and simple directions for doing perfect dyeing of all sorts of material; silk or wool; linen or cotton goods; mixed goods, or any goods at all; and explains finding of fabric names. Or, send for a darveling book of 200 directions in four colors, by Color Craft. Address DIAMOND DYES, Dept. 821, Windsor, Ontario.

Dip to TINT—Boil to DYE

World's Record Hen

White Leghorn Hen Proving a Money Maker for Her Owner

"Mable," the White Leghorn hen, that last year established a world's record by laying 351 eggs in a year, is proving a big money maker for the University of British Columbia Farm. Known as "Hen No. 6," she has not only broken her own world's record pen, but with her eggs is bringing into the treasury of the University a handsome sum.

"We have actually sold $1,625 worth of stock from Hen No. 6 and her progeny," said Prof. E. A. Lloyd, head of the department of poultry husbandry. "Hen No. 6 is a member of the which will bring the total up to $2,300," says Prof. E. A. Lloyd, head of the department of poultry husbandry. "Hen No. 6 is a member of the world's record pen, from which we are also selling a considerable number of eggs for hatching purposes. From the other four 300-egg members of this pen, at $5 to $10 per egg."

The record hen and record pen have found a market in all parts of Canada, the United States, and as far away as Australia.

King Alfonso Drives Auto

Has Quickness of Perception Necessary to Good Driver

King Alfonso, known to be the best driver among royalty and because he approaches the American in type and has the quickness of perception necessary to the good driver, according to Marquis Raoul Brown, Buenos Aires, Spanish Commissioned to make a charter of 2,000 motored for the New York Yacht Club. Miss Browne has returned to New York with her fiance aboard.

Although Alfonso is given to driving at great speed, he never has had an accident, chauffeur Hubbard declares, because he thinks and acts quickly, knows his car, sees that it is kept in perfect order, and speed is not dangerous on the highways in Spain are noticeably free from traffic.

Canada's Air Mail

Flying Conditions Will be Investigated Before Contracts are Let

The experimental work in connection with the post office department's air-mail program will not likely commence until the early fall.

It has been decided not to call for tenders for any definite air-mail routes at the present time. But Radio summer the Royal Canadian Air Force will undertake some experimental flights over the Rocky Mountains, and will carry on into the winter months. The intention is to secure accurate information respecting flying conditions in the mountain districts are entered into with private concerns.

Largest Landowner in Empire

Sir Sidney Kidman, known as Australia's cattle king, will shortly visit England and America on a combined holiday and business tour, during which he will make inquiries regarding the best trade in Canadian bred man owns flocks and herds by the hundred thousand in South Australia and is reputed to be the largest landowner in the British Empire. He started on a cattle farm at $2.50 a week.

The Power of Advertising

Card in Florida paper—"Thursday I lost a gold watch which I valued very highly. Immediately I inserted an ad in your last-and-found column, and waited. Yesterday I found the watch in the pocket of another suit. God bless your paper."

A Hindu artist is planning a world tour, during which he hopes to pay his expenses by writing on grains of rice. Working four hours, he is able to write four hundred letters on a single grain.

Brands of cigars in England are being named after prominent ecclesiastical dignitaries. Holy Smoke!

Advance in Medical Science

Instead of Eating Fasting is Recommended as Cure

Somebody dug up a document out of some eighteenth century papers describing some curious practices of the medical faculty in those days. One of these papers revealed that sick persons were sometimes ordered to eat seven meals a day, as much as they could stuff at a time, with concomitant copious drafts of brandy, sherry and other wines.

No doubt the idea was that the patient should "eat to keep up his strength."

Nowadays the tendency is especially among the chaps who make easy money by writing medical cut lines in the newspapers' item, to exact their patients to go without a square sick toilet, precisely in the opposite direction.

People are sold to take plenty of exercise — pushing themselves away from the table, for instance, before they are satisfied, and to get right out and down on diet substantially, but even to indulge in a fast for a few days or a few weeks occasionally.

In fact, fasting seems to be recommended as a sort of cure-all.

This complete turn of the wheel reminds us of the story of the man who went to a doctor and complain of of stomach trouble. "Take heavy food," said the medico, "and that should cure your ailment."

A week later the man went back and said the trouble was worse than before.

"Eat very sparingly," replied the physician, "and that should cure your ailment."

"But, doctor," protested the man, "you told me just the reverse last week."

"Um, yes," said the wise man. "But, you see, medical science has made vast strides since then."

World's Most Modern Warship

Last One Allowed Great Britain Under Washington Treaty

The 35,000 ton Nelson, the last battleship Great Britain can lay down under the Washington Treaty of Washington treaty, has arrived at Southampton from the Tyne shipyards.

She is the absolute last word in battleships, said to be the most modern in the world, and the first British battleship to be completed with no gun turret. The turrets each contain three 16-inch guns, while astern are six steel turrets. In addition she has a main deck one inch of armor plate. She shells weighing more than a ton. The guns themselves weigh a fifth of a ton and can be fired once every minute. The ship is protected from aircraft by heavily armored decks, and under water it is designed to resist the explosion of more than four tons of high explosive. Searchlights and catapults for discharging them are carried in kept secret. The battleship is 702 feet long, 106 feet broad, and has a crew of 1,200 officers and men. It cost £7,000,000 ($35,000,000) to build and requires £422,000 (£2,160,000) for annual up-keep.

Treat corns with Minard's Liniment.

To Extend Phone System

Manitoba to Spend Large Sum on Extension of Service This Year

The Province of Manitoba proposes to spend nearly $750,000 this year on extensions to the provincial telephone system. Underground and aerial cable construction in Winnipeg will account for most of the money to be spent in Winnipeg while $100,000 is to be spent for subscribers' station equipment.

Rural lines in the outside of Winnipeg will be constructed at a cost of nearly $90,000, while another $20,000 will be spent on long distance lines at six points in the Province. Several new toll lines will be constructed this summer.

Pastured Fallow not Profitable

Seeding mixed cereals or rape to be pastured off during the fall or following year does not appear to be an economical practice according to the results of a series of experiments at Dominion Farms, Manitoba. Professor of Farm. The growing of rape or cereals to be pastured off does not control the weeds effectively and dissipates rather than conserves the moisture as compared with the fallow. The two most important functions of the fallow are thus frustrated.

Lethbridge Irrigation District

The Lethbridge Northern irrigation District exists upon the supply with an additional 16,000 acres of land, which may be put under the last summer and fall. There has been a considerable influx of new settlers, mainly from Europe.

The old gentleman was a trifle bewildered at the elaborate wedding. "Are you a groom?" he asked the melancholy looking young man. "No sir," the young man replied, "I was eliminated in the preliminary trials."

Nothing pleases a man with a well-developed sense of humor so much as setting two chronic boys to boring each other.

Pekin is one of the oldest cities in the world, being known, to exist in the twelfth century before Christ.

Keep Minard's Liniment in the house.

Many Vanished Cities Are Being Sought

Important Discoveries Made of Life Thousand of Years Ago

Never have so many spoils of vanished cities been in progress as in these days. Far more important discoveries are being made of life two, three and four thousand years ago than or additional historical facts or two, three, or four hundred years since. Particular interest attaches to a recent find of 4,000 year tablets which are now being dug up. One is Sgina, which was founded at the month of the Po soon after the time of Abraham, and hundreds of years before the birth of Tutankhamen. Four centuries it was a prosperous river port, inhabited by the early Greeks. Then the river, known as the Eridanus in those days, silted up and left Sgina standing inland.

Ur Augustine's time, some 2,000 years ago, it had dwindled to a village, and soon lapsed altogether into mud from recurrent floods covered it up. Of late 500 or 600 tombs have been located and opened, and in beginning, and many thousand necklaces, ear-rings, finger-rings, and other pieces of jewellery, and vases, have been recovered. The finds are of the forty centuries ago is Mesrah Benjamin, nine miles north of Jerusalem, whereabouts the Hittites lived. Dr. William Neale and Major W. C. Gotschell hope to come across there some bilingual tablets of sandstock clay that will yield a key to the almost unknown Hittite language. Scraps of Hittite have already been found on Babylonian and Syrian tablets.

WEAK AND NERVOUS

The Condition of a P. E. I. Lady Who Again Rejoices in Good Health

"I can most highly recommend Dr. Williams' Pink Pills to all weak and nervous." Mrs. Angus Agnew said, Wellington Station, P.E.I. "Before I began their use I was very weak and nervous. I had worked hard, with no thought of my health, while doing so, and when I first felt me, I began to feel tired and depressed, and after a short rest at night, feeling just as tired in the morning as when I went to bed the night. I began to feel discouraged when I would think of the work before me for the day, and had no some medicine from the doctor whom I consulted, but got no relief. Because to meet my cases as I assumed no improvement while using it. Then a neighbor advised me to try Dr. Williams' Pink Pills, and I got a supply of this medicine. I very soon found they were helping me, and I continued their use for about two months, when I found I had been strong and well once more."

Dr. Williams' Pink Pills do one thing—and do it well. They build up, purify and enrich the blood, and as this blood supplies every part of the body, new life is given to the entire system. Better sleep, steady nerves, improved appetite, and renewed vigor—all these can be yours by taking Dr. Williams' Pink Pills. 50 cents a box. Sold by all medicine dealers or by mail postpaid, at 50 cents a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

A New British Embassy

Work on Building in Washington Will Begin Soon

Great Britain is paying to Washington the high and unusually advantageous compliment of planning a stately new Embassy. Reminiscent of England two centuries ago, the Embassy will occupy Massachusetts Circle, half a mile from the Nation al Episcopal Cathedral.

The architect is Sir Edward L. Lutyens, the architect of the new Government buildings at Delhi in India, and Whitehall Court and Hut in London, and of a number of other notable buildings. Co-operating with him is Frederick Brooke, of Washington. Work has not just arrived from England, and work on the new Embassy will soon be begin.

Deserted by their mother, three lion cubs, born in Oakland, California, were adopted and fed by a Spanish setter.

In order to forecast the weather with a measure of success, all you have to do is predict anything you don't expect.

Rich men have their country places but poor men must be satisfied with farms.

Leaders Of Them All!

The highest expression of Firestone quality and value is the Full-Size, Gum-Dipped Balloon. This pioneer among Balloon tires—and the leader proved by performance—was made possible by Gum-Dipping, Firestone's extra process for strengthening the walls to endure the extra flexing strain.

Learn from your Firestone dealer the many advantages of Gum-Dipping — the added comfort, dependability and greater economy.

Little Helps For This Week

As many as I love, I rebuke and chasten.—Rev. iii. 19.

Great Master, touch us with Thy skilful hand.
Let not the music that is in us die.
Great Sculptor, hew and polish us; nor let us lie
Hidden and lost. Thy form within us see.
Spare not the stroke, do with us as Thou will.
Let Thine be naught unfinished, broken, marr'd;
Complete the purpose that we may become
Thy perfect image, O our God and Lord.—Heatha Bonar.

Troubles are often the tools by which God fashioned us for better things. God Almighty casts a man down when He wants to fashion him and the chiselling is always to make him something finer and better than before. —Henry Ward Beecher.

A gem is not polished without rubbing, nor a man perfected with out trials.—Chinese.

The First Teetotal Pledge

Was Signed by Seven Advocates of Temperance 54 Years Ago

On the death of Thomas Cook, founder of the famous tourist agency, which recently removed to new premises built on the site of Devonshire House, its executors presented the piece of paper on which was written the first teetotal pledge, a document hardly noticed to the late Sir George Williams, founder of the Y.M.C.A. who was for that time President of the Band of Hope Union.

On September 1st, 1832, this pledge will reach its centenary for It was just over fourteen years since seven advocates of total abstinence from intoxicating liquors signed their names to the first teetotal pledge: "We agree to abstain from all liquors of an intoxicating quality except ale, as a beverage, or ardent spirits, except as medicine."

An Oil that is Famous. Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand That is for oiled enough to attest its excellence, for in all these countries it is on sale and in demand.

The tenant of the Foulis estates in Scotland, in accordance with an old feudal agreement, has presented to the rent for his lands with a bucketful if snow.

It is difficult for a stout woman to get away from solid facts.

BAYER

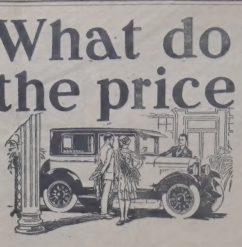
AGENT FOR MASSEY HARRIS, DELIA

What do you get for the price you pay?



VALUE is not a matter of price alone. It is simply what you get for the price you pay. Chevrolet is low in price—but not at the cost of quality. Chevrolet's performance—it's no cheaply built. It is superior in value because it gives more of the things you want for the price you pay.

First and always, quality counts with Chevrolet. There is quality in the distinctive Fisher bodies, in the long, low lines, in the rich, luxurious appointments, in the smooth, valve-in-head engine, in the dozen refinements, such as air cleaner, oil filter, gas strainer, in the luxury of its appointments and upholstery, in the long, resilient springs. In every way, Chevrolet is outstanding.

The Most Beautiful Chevrolet in Chevrolet History. Now selling at new and lower prices—the lowest for which Chevrolet has ever been sold in Canada.

THURSDAY, MAY 12, 1927

International Wheat Pool Conference

In the feature address of the International Wheat Pool conference held at Kansas City, Missouri, on Thursday, May 5th, H. W. Wood, one of the dominant figures in the Wheat Pool movement in Canada, expressed himself as opposed to a world wheat Pool under control of the U.S.A.

"If what is meant by a world wide wheat pool is the merging of all co-operative wheat selling into one pool unit under some kind of central management, then I am unalterably opposed to it, because I do not believe it practical to do so," Mr. Wood said.

The chairman of the board of directors of the Alberta Wheat Pool delivered the feature address of the conference, and gave a careful exposition of the economics of the Wheat Pool. He explained the Canadian Pool's attitude towards international pooling by saying that everything should be done to extend the Pool system of marketing to all the wheat that is grown in the world, but on the unit plan, with each Pool unit taking the responsibility of its own work. Then between the Pools there should be the closest kind of co-operation, especially in co-ordinating their selling.

Referring to the operations of the Canadian Pool, Mr. Wood said: "We have a Wheat Pool in Canada handling over half the wheat, while the wheat growers in United States are protected by a 42 cent. per bushel tariff. On the day I am writing this May wheat closed in Winnipeg at $1.42⅝, and in Chicago at $1.38⅝. The Grain Trade may tell us that the Wheat Pool had nothing to do with the higher price in Winnipeg. Be that as it may, the situation is suggestive."

The speaker read a despatch from Glasgow, Scotland, in which Alexander Buchanan, chairman of a Baking Society, complained of the Wheat Pools of Canada holding up the price of wheat in the face of a world's surplus.

Mr. Wood said: "I presume that Mr. Buchanan, as chairman of a baking society, thinks the baker is entitled to include all costs of production with a reasonable profit, in the price to the consumer. This, of course, is a perfectly normal attitude of mind. He also seems solicitous of the interests of the consumer and bewails the fact that the usual drop in price did not occur when there happened to be a moderate increase in the visible supply of wheat. He seems to think that as a matter of course the producer would take the drop as some sort of a moral obligation regardless of the cost of production or losses to the producer. While his mind seems to be perfectly normal in regard to the right relationship of prices between the producer, or baker, of bread and the consumer, his vision does not extend to the producer of wheat."

Local and District

Arthur Rowe made a business trip to Calgary on Tuesday

• • •

Mrs. Bigelow was a visitor to Youngstown over the week-end.

• • •

J. Brunner, of Taber, was a business visitor in town on Wednesday.

• • •

We are now experiencing fine, dry weather, and seeding operations in many places are in full swing.

• • •

A. F. Cobb, manager of the Farmers' Store, was a business visitor to Calgary the beginning of this week.

• • •

Mrs. Geo. Farquhuson and children spent last week in Craigmyle, the guests of Mr. and Mrs. Louis Golda

• • •

Pat Moran, who has been spending a couple of days in Delia, returned home this morning (Friday).—Drumheller Review.

• • •

Necessary repairs to the sidewalks on Main Street are being effected by Bert ("General") Jackson, which should ensure safer walking for pedestrians.

• • •

A dance was held in Mason's Hall on Tuesday night, put on by Art. Wade, who presented Leo Davis and his Acadians, advertised as "the peppiest band in Alberta." There was a good crowd, and good music, and everyone who attended had an enjoyable time.

• • •

The Garrick Club, of Hand Hills, are putting on the play, "David Garrick," recently shown at Craigmyle and Delia, in Bell's Barn, half mile south of Blair School, on Friday, June 10th. There will be a dance after the play. Further announcements later.

• • •

Talk about the goose that layed the golden egg, but this is no fable. E. L. Venus, of the Hand Hills brought into this office on Tuesday an egg weighing ⅔ of a pound, layed by the Toulouse variety. Mr. Venus says he has only three geese, which includes a gander, and has a setting of 30 eggs, and they are all very much alike. He has the egg on exhibition in the Farmers' Store.

• • •

Owing to the fact that the Women's Institute Annual Convention is to be held in Edmonton, Alberta, during the last week in May, the regular monthly meeting of the Delia Women's Institute will be held on Thursday, May 19 at 2:30, instead of the last Wednesday in the month. Mrs. Gibson of Drumheller, Constituency Convener, will give a short talk, and Mrs. Vallery of Munson, will speak on the work of the girls' clubs. All women are cordially invited to attend.

• • •

On Tuesday night as Messrs W. King, Jas. Bonner, and Norman Campbell were walking along Main Street they observed a car on fire opposite the Canadian Bank of Commerce. With great presence of mind they pushed the car out into the middle of the street and rang the fire bell, when the members of the brigade turned out promptly. In a short time they had the fire entirely extinguished, but not before some had their hands burned trying to remedy a short circuit which was the cause of the fire. We understand the car is owned by Geo. Martin, and was being loaned to one of the bank boys. But for the promptness of everyone concerned the flames might have caught the gas tank, causing a dangerous explosion, which was timely avoided.

A dance was held at the Lawsonburg School on Friday, April 29 to raise funds for playground equipment, the proceeds of which amounted to the sum of $26 75. Much credit is due to the willing co-operation of the community in making the dance a success. The music was donated by Messrs. F. Koller and H. Shouks. The ladies served lunch at midnight. Everybody spent an enjoyable evening.

CANADIAN NATIONAL EUROPEAN TOURS

A maximum of travel through particularly interesting countries at a minimum of expense is provided in the Canadian National Educational Tours this summer through Scotland, England, France, Belgium, Switzerland and Italy.

Two tours have been arranged and sailing will be made from Montreal, July 8, on the S. S. "Andania," direct to Glasgow. Special attention has been given to itineraries involved.

Tour No. 1 is a 47-day trip on sea and land, visiting important cities in Scotland, England, France, Belgium, Switzerland. All expenses, $672.50, Montreal to Great Britain and the Continent and return to Montreal.

Tour No. 2 is a 51 day trip on sea and land, visiting in Scotland, England, France, Belgium, Switzerland and Italy. All expenses, $691.00, Montreal to Great Britain and the Continent and return to Montreal.

There will be low excursion fares to the seaboard from points in the Prairie Provinces.

These tours will be personally conducted from Western Canada, and while overseas will be under the direct care and supervision of thoroughly responsible and reliable organization, fully qualified in every particular to successfully look after the interests of our patrons.

The sight seeing program is very complete and generous. Motor coaches and automobiles are freely used. All sight-seeing is well planned to save unnecessary fatigue and to see the worth while places within the time at our disposal. Competent lecturers will reveal to our patrons the outstanding features, literary, historic, artistic or scenic of the Old World centres visited.

E. M. BOSWORTH, local agent for the Canadian National Railways, will be glad to discuss these tours and arrange all details.

14-2ts.

Are These False Teeth?

Teeth, teeth—human teeth! The scientists are all a-flutter! A professor in Montana has dug up a tooth which he declares to be the most important fossil ever found. Its value lies in its being the ripe old age of "perseety" 75,000,000 years. (He adds—"certainly over 30,000,000." What does a little 45,000,000 one way or the other mean to us in these days?)

Another brother has extracted a tooth from a limestone cave in China. This one, we are told, carries the human race back only 2,400,000 years (possibly we should allow a month or two over). This exact scientific information has been widely broadcast by newspapers and periodicals, and many unthinking folks are ready to swallow these teeth as concrete evidence against the Bible light on man's antiquity.

It has been well said: "Sufficient unto the day is the drivel thereof."

In the first place there is a little question as to whether or not these are "human" teeth. They may even be "false teeth," like some other famous "evidence" produced by evolutionists.

Furthermore, the method of calculating their antiquity by allowing so many years for the formation of Earth Strata lying above them has more than once been exposed as a fallacy.

The pity is that some of this cocksure knowledge that can fix the age of a tooth found in the ground can not be put to work diagnosing and relieving some of the human ills of today.

[Taken from "The King's Business," March, 1927.

"The last shall be first" may apply to baseball at the end of the season.

Raise Larger Crops and Make More Money

Plow 5 to 8 acres daily

In crop production the Fordson farmer's advantages are sevenfold:

First —He prepares an ideal seed bed. Fordson speed and power allow enough use of plow, disc, cultivator and harrow producing a splendid state of tilth in which young plants thrive heartily.

Second —He prepares as much land for field crops as he had planned.

Third —He gets his seeding done on time.

Fourth —He accomplishes the work with greater ease and convenience.

Fifth —He receives a larger yield from timely work well done.

Sixth —His cost is much lower because one man can do two or three times as much work.

Seventh—He makes more money.

Double disc 15 to 25 acres daily

Seed 25 to 40 acres daily

In addition the Fordson farmer has ample power for such belt jobs as threshing, filling silos, baling hay, grinding grain, sawing wood, and many others.

Over 17,000 Fordson farmers in Canada enjoy these advantages.

Wheat Pool Contracts

The second series of Wheat Pool contracts have been issued. The first man to sign one of these new contracts was J. E. Gustus, who farms 1,600 acres in the Calgary district. Mr. Gustus also signed the first contract ever issued by the Alberta Pool and is thus the first man in Canada to sign a Wheat Pool contract.
